To whom it may concern:

July 2nd, 1913.

The Chicago Millwork Supply Company are valued depositors of ours, and we take pleasure in recommending them to those who may anticipate doing business with them.

The general reputation of the firm is excellent, the officers are well known and highly regarded in this community.

We feel confident that any statement they make or any contract entered into by them could be relied upon.

Yours very truly,

EHP/A.

are
Strong
Evidence
of Our Re-
sponsibility
and Integrity

TO WHOM IT MAY CONCERN:

It gives us pleasure to recommend the Chicago Millwork Supply Co., and testify to their integrity, reliability, and general business ability.

They are the largest mail-order house in Chicago, in their special lines, and thoroughly responsible.

Parties may feel perfectly secure in sending them the money with their orders, as we understand the company agrees to promptly rectify mistakes of whatever nature on their part to the entire satisfaction of the purchaser, or refund the money immediately. The officers and stockholders of this company are well and favorably known to us, they have had a lifelong experience in their line of business, and can be relied upon to do exactly as they agree.

Yours Very Truly,
INDUSTRIAL SAVINGS BANK.

Samuel Smith
President

Our Positive Bonded Guarantee

WE guarantee that each and every article in this catalogue is exactly as described and represented, thus, must be fully satisfactory in every respect to our customers. If, through a mistake or misunderstanding, you do not find the goods, when received, just as ordered and exactly as represented by us, we permit unconditionally the return of any or all of such unsatisfactory goods and we agree to promptly return to you any money you have paid us for such goods together with transportation charges both ways, so that the transaction will cost you nothing, or will make exchange of such goods returned for others that are satisfactory in case you ask us to.

Know All Men By These Presents:

That we, Chicago Millwork Supply Company of Chicago, County of Cook, State of Illinois, as Principal, and National Surety Company, a corporation organized under the laws of the State of New York, as Surety, are held and firmly bound unto Bray M. Jones, Notary Public, of Chicago, County of Cook, State of Illinois Trustee, for the benefit of Sundry Parties as their respective interests hereunder may appear in the penal sum of Ten Thousand Dollars (\$10,000.00), good and lawful money of the United States of America, for the payment of which, well and truly to be made, we bind ourselves, our successors and assigns, jointly and severally, firmly by these presents.

SEALED with our seals and dated this 6th day of January A. D., 1916.

WHEREAS, Chicago Millwork Supply Company is engaged in the sale of its manufactured Doors, Blinds, Sash and other articles of like nature, as more fully described and set forth in their Regular Printed Catalogue, and,

WHEREAS, Chicago Millwork Supply Company, for the protection of its customers, agrees to guarantee to purchasers of its various commodities that each and every article shown in their Catalogue is exactly as described and represented in said Catalogue; and desire to give a Bond of Indemnity guaranteeing that each and every article shown in their Catalogue to be exactly as described therein, and,

WHEREAS, for the convenience of their customers, wherever located, Chicago Millwork Supply Company has duly appointed Bray M. Jones, of Chicago, Illinois, as Trustee under this bond, for the benefit of whom of their customers may have interest hereunder.

NOW, THEREFORE, THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, that if Chicago Millwork Supply Company, as Principal, and National Surety Company, as Surety, shall faithfully guarantee that each and every article shown in the Regular Printed Catalogue is exactly as described and represented therein; and if, through any mistake or misunderstanding, any goods when received by purchasers thereof are not as ordered and exactly as represented in said Catalogue, Chicago Millwork Supply Company shall permit unconditionally the return of any or all such unsatisfactory goods, and promptly return to the purchaser any money paid for such goods returned as unsatisfactory, together with transportation charges both ways on such goods, so that the transaction shall cost the purchaser nothing; or if Chicago Millwork Supply Company shall exchange such unsatisfactory goods for other goods that are satisfactory, in case the Purchaser request them to do so, then this bond shall be void; otherwise, to be and remain in full force and virtue in law.

PROVIDED, however, and it is understood and agreed, the maximum liability hereunder shall not in any event exceed the sum of Ten Thousand Dollars (\$10,000.00).

PROVIDED further, and it is understood and agreed, the term of this bond is for a period of one year, beginning January 29th, 1916, and expiring January 29th, 1917; and no action, suit or proceeding shall be instituted or maintained under this bond, unless the same be brought or commenced within three months from and after the date of expiration, and this bond may be renewed upon expiration for a further period of one year, from year to year, if the Surety so elect, by an instrument in writing duly executed by the Surety by its officers proper for the purpose.

BY: *Carl P. ...*
Assistant Secy. Secretary.

THE CHICAGO MILLWORK SUPPLY COMPANY.

By: *H. B. Munger*

NATIONAL SURETY COMPANY,
W. M. ...
Resident Vice President.

For Your Protection

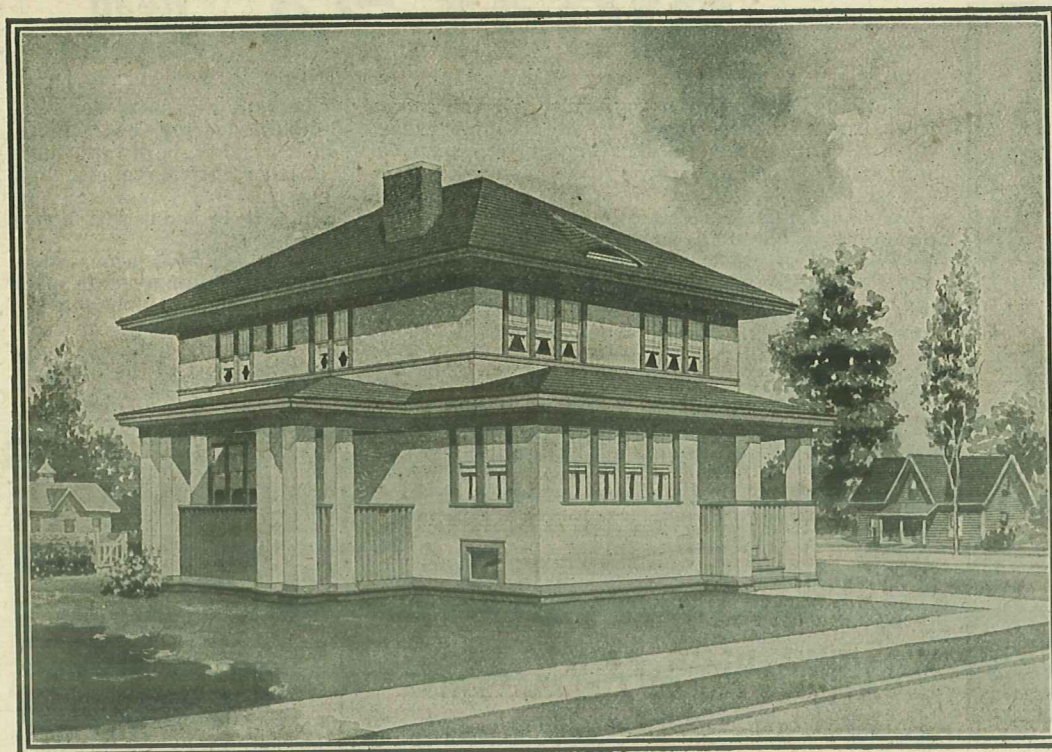

We have executed this \$10,000 bond which we have placed behind our liberal, legal and binding guarantee. It protects you absolutely.

You may feel perfectly sure that any orders you may favor us with will be filled to your entire satisfaction or your money will be refunded in full, promptly and without question.

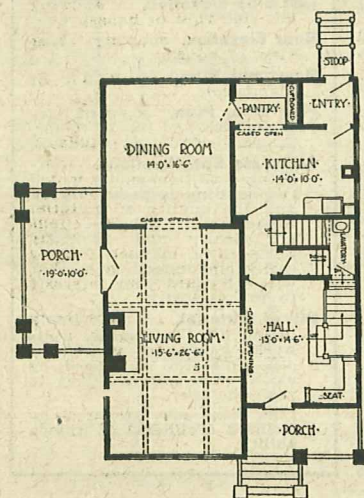

Handsome Stucco Residence. Eight Rooms

\$1520.58

Read
Page 64

Design 120—Size 30x44½ feet, not including porches.

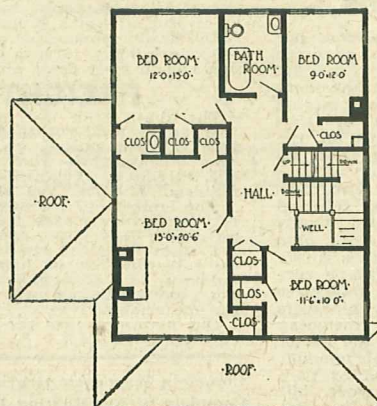

First Floor Plan

NO TIME WASTED

Your time and attention may be devoted to ordinary duties while the work on your new home progresses. Building need not interfere with your work. There will be no reason for worry or loss of time. You may rest secure in the knowledge that your home will be built right if built according to our plan.

A LOT 50 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING

Second Floor Plan

For \$1520.58 we agree to furnish all the material complete, necessary to build this eight-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 120.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$3499.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

MOST PLEASING TYPE OF CONSTRUCTION

Popular favor has placed its stamp of approval upon the stucco house. In this design will be found one of the most pleasing types of this class of construction, both from artistic and economical standpoints.

The reception hall into which one enters directly from the front entrance is particularly large and roomy. From here a handsome run of stairs extends to the second floor. A built-in seat at the foot of the stairway is another pleasing feature. The living room is ideal with its heavy beamed ceiling and fireplace. From here one may pass through the French doors directly into an enclosed porch, which may be converted into an out-of-door living room in summer. The kitchen is well lighted and convenient; the pantry close at hand and fitted with a built-in cupboard. Back stairs from this end of the house also lead to the second floor, while another flight leads to the basement.

Four large chambers and a bath are found on the second story. One bedroom is especially spacious and contains a beautiful fireplace mantel No. 3356. This floor contains ample closet space.

The interior finish is of clear southern yellow pine. All shellac, filler and varnish for interior finish supplied by us, as is also paint for outside trim. Height of ceilings, first floor, 9 ft.; second floor, 8½ ft.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 120.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Complete Warm Air Heating Plant for this building \$163.73

Typical Los Angeles Bungalow

Construction adapted
to colder climate

\$1041.74

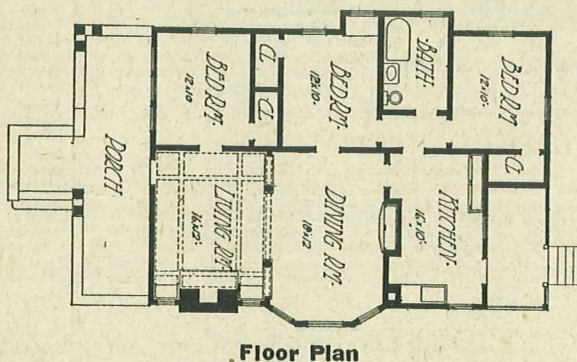

Read
Page 64

Design 148—Size 29½ x 42½ feet, not including porches or bays.

Our Specifications

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple, economical basis, which may be thoroughly understood before any work is commenced.

**A LOT 40 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING**

Reversed Plans

Plans for any of our stock designs may be furnished "reversed," that is, the arrangement of all rooms will be just the opposite of that which appears on the original plan, but all printed matter will be backwards. For this reason with all reversed plans, we also supply the regular stock plan so that all sizes, directions, etc., will be perfectly clear. Our price for reversed plans is \$2.50 per set, including specifications and list of material. This amount to be credited as part payment of your bill providing your material is ordered from us.

For \$1041.74 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 148.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$2093.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

One of the chief objections to the bungalow type of building by the uninformed is the supposition that they are not sufficiently warm and substantial for the climate of the northern states.

Our bungalows embody all of the artistic features of those designed for the climate of California, but are as warm and substantial as any building erected in the north. In other words, the construction is the same as that of every other building erected in this climate, including sheathing, floor lining and heavy building paper.

This design contains six rooms and is very popular. The front porch extends entirely across the building, and from here one enters immediately into a handsome living room with modern beamed ceiling, fireplace, built-in seats and beautiful colonnade, the latter dividing it from the dining room. The dining room has a built-in sideboard and large bay windows. A sink and cupboard are contained in the convenient, well-lighted kitchen.

All the bedrooms are located on one side of the house. All are large, comfortable and have plenty of closet space. The bathroom is easily accessible and is strictly modern.

All interior finish is clear southern yellow pine. All necessary shellac and varnish are included in our bill.

All paints for exterior, your choice of colors, are supplied by us.

Height of ceilings, 9 feet.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2577.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A COMPACT, PRACTICAL AND VERY DESIRABLE HOUSE

strictly modern throughout. The rooms both upstairs and down are arranged with a view towards comfort and convenience.

From a spacious front porch a handsome front door of our Evanston design opens into a charming reception hall from which a well designed flight of stairs leads to the second story. The living room is large and comfortable, the wide cased openings leading to the reception hall and dining room giving the room an effect of still greater proportions. The dining room is of ample size and contains our buffet sideboard No. 476 A. A well lighted pantry connects the dining room and a conveniently arranged kitchen. From the latter a short run of steps leads to the main stair landing making the upstairs rooms easily accessible from this part of the house.

Four bedrooms and a bath make up the second story rooms, all opening into a main hall. The bath room is supplied with medicine cabinet No. 460.

The entire building is finished with clear southern yellow pine suitable for either oil finish or paint. Hardware of our Imperial design. Paint for two coats outside, your choice of colors. Shellac and varnish for inside trim and floor.

Double Residence for Two Families—Modern

\$1869.21

Read
Page 64

Design 152—Size 40x36 feet, not including porches or bays.

For \$1869.21 we agree to furnish all the material complete necessary to build this fourteen-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 152.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$3860.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

This is one of our most popular double residences of the square type. It is in reality two homes under one roof, each complete in itself, and each entirely separated from the other.

The rooms are particularly well arranged for comfort and convenience and will strongly appeal to the average renter.

The living room, which has a handsome fireplace mantel, No. 3371, opens into a large hall and the dining room through large casement openings. A sideboard is built in the wall of the latter room, our No. 464A.

The kitchen is convenient and is connected with a nice, well lighted pantry containing work table and shelves. A sink also is part of the kitchen equipment. The basement is reached by stairs leading from this room.

Four good size bedrooms, a smaller dressing room and a bath are located on the second floor, each opening on to the main hall. Five ample closets are found on this floor.

Clear, southern yellow pine is used for the interior trim throughout the entire building; shellac and varnish for finishing supplied by us. The outside to be painted two coats, your choice of color. Height of first floor ceilings, 9 feet; second floor 8½ feet.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

This design is one of the most attractive of our double houses. It is of the popular square type, well proportioned and massive in appearance.

Each apartment contains seven rooms and a bath, and each is entirely separated from the other by a solid partition extending through the entire building.

The front entrance leads through a vestibule into the living room, on one side of which there is an attractive fireplace and on the other side open stairs ascending to the second floor.

The living and dining room are large and comfortable. The kitchen has a serviceable sink and the pantry is equipped with shelves and a work table. A smaller room connected with the kitchen will serve a multitude of uses.

All rooms on the second floor are of ample size and all have plenty of closet space. The bathroom at the end of the second floor hall is conveniently located and within easy reach of all bedrooms.

Clear southern yellow pine is used to finish the interior of the entire building, all to be shellaced and varnished. This, together with sufficient paint, your choice of colors, to cover the outside of the house, are included in our bill of material. Height of ceilings, first floor 9 feet; second floor 8½ feet.

THE COST OF YOUR HOME

is entirely settled before you spend a single dollar for building material, when following our plan. When we send working plans and specifications we state our price on all material including freight charges. You know exactly what the cost will be when goods are laid down at your station, freight prepaid. Freight charges increase our f. o. b. mill price so little that it will probably surprise you. We secure lowest railroad rates.

A LOT 40 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING

Second Floor Plan

For \$902.82 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 104.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2206.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

JUST THE HOME YOU ARE LOOKING FOR

Many will find in this beautiful stucco building just the home they are looking for. Though built along lines almost severely simple, it expresses good taste and refinement in the highest degree.

The front porch is enclosed on all sides and is reached only by a door leading from the living room. This gives it a certain amount of privacy that permits of its being furnished, during the summer months, practically adding another room to the house.

Stairs to the second floor lead directly from the front hall. Several steps from the kitchen to the stair landing make the upstairs rooms accessible from the rear of the house. The living room is large and cheerful and furnished with a handsome fireplace. The dining room is furnished with a beamed ceiling and plate rail. The kitchen and pantry are light and convenient. Stairs from the kitchen lead directly to the basement.

The second floor has three chambers and a bath, the front bedroom being unusually spacious. The bathroom is easily accessible from any part of this floor. Plenty of closet space is provided.

The entire first and second floors are finished in clear southern yellow pine. Height of ceilings first floor, 8½ ft.; second floor, 8¾ ft.

Paint for outside trim, your choice of colors. Shellac and varnish for inside trim and floor.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 104.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Second Floor Plan

A LOT 60 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

For \$1290.81 we agree to furnish all the material complete necessary to build this eight-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 125.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2887.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

AN EXCELLENT HOME FOR A LARGE FAMILY

This building makes an excellent home for a large family. The arrangement of the rooms is as comfortable as the exterior is pleasing. The unusual number of windows assures plenty of light and sunshine, a feature now recognized to be of the utmost importance from the standpoint of health as well as comfort.

A large porch extends entirely across the front and along one side of the building. All of the rooms on the first floor are large and pleasant, and arranged for convenience and comfort. The reception room and library are joined by a colonnade of our design No. 736. A handsome stairway leading to the second floor has an unusually large landing, with a long built-in seat. This landing is also reached from the kitchen by a short run of steps. A china closet of our design No. 476 is built in a recess in the dining room.

The second floor has plenty of room and an abundance of closet space. The bath is centrally located. A large balcony just outside one of the bedrooms is another pleasant feature of this building.

The entire house is finished inside with clear yellow pine. Paint for two coats outside, your choice of colors. Shellac and varnish for inside trim and floor. Hardware of our Majestic design.

Excellent Example of Modern Stucco Residence

\$842.08

Read
Page 64

For \$842.08 we agree to furnish all the material complete necessary to build this seven room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 126.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2055.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

DISTINCTLY MODERN IN ARRANGEMENT AND CONSTRUCTION

This is a stucco house distinctly modern in arrangement and construction. The treatment of the building is eminently satisfactory and will be found most practicable. A large roomy porch extending entirely across the front of the building may be furnished and used as an out-of-door room during the summer months.

A large reception hall opens directly into the living room. From the former a handsome flight of steps extends to the second floor. The living room is pleasant, well lighted and has a fireplace in one corner. Both the dining room and kitchen are convenient, light and pleasant. The pantry is equipped with a case of drawers as an added convenience.

The division of the second floor is ideal; all the bedrooms and the bath open on the main hall. All bedrooms are supplied with closets.

The interior is clear southern yellow pine. Height of ceilings, first floor, 9 ft.; second floor, 8 ft. Paint for outside trim, your choice of colors. Shellac and varnish for inside trim and floor.

No Chance for Errors

Our plans have been prepared by practical men and have been proven right. All plans are accurately drawn to a scale and are so plain that any carpenter or contractor can easily understand them.

Reversed Plans

Plans for any of our stock designs may be furnished "reversed," that is, the arrangement of all rooms will be just the opposite of that which appears on the original plan, but all printed matter will be backwards. For this reason with all reversed plans, we also supply the regular stock plan so that all sizes, directions, etc., will be perfectly clear. Our price for reversed plans is \$2.50 per set, including specifications and list of material. This amount to be credited as part payment of your bill, providing your material is ordered from us.

Floor Plan

**A LOT 40 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING**

For \$1255.57 we agree to furnish all the material complete necessary to build this five-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 149.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2378.00, including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

The beauty of the California bungalow has attained a fame that is country wide. This style of architecture has been developed in the western states until it combines comfort and attractiveness to a remarkable degree.

The design here shown is substantially constructed with sheathing, siding, floor linings and heavy building paper, to withstand long, cold winters when necessary, consequently may be built in any climate. It has a beauty and a charm that is not found in buildings of any other type.

A large, comfortable porch leads directly into the living room, which extends entirely across the front of the house. A cozy fireplace at one end adds to the comfort of this room. Between the living and dining rooms is a wide colonnade. The dining room has a modern beamed ceiling and built-in sideboard.

The well lighted kitchen has a large cupboard and sink. Stairs from the kitchen lead to the basement and other stairs from the hall lead one to a large attic which, if desired, may be finished, thereby adding another room to the house.

The bedrooms have plenty of closet space and are located on each side of the bathroom. A popular feature of this design is the large, well protected sleeping porch.

All rooms are finished in clear, southern yellow pine.

Paint for two coats outside, your choice of colors, Shellac and varnish for inside trim and floor. Supplied by us. Height of ceilings, 8 ft.

Plan

**A LOT 35 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING**

For \$1452.52 we agree to furnish all the material complete necessary to build this eleven-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 150.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$3073.00, including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

This two family building has the appearance of a single residence and may be erected on a lot thirty-five feet wide.

The first apartment has five rooms and a bath, the second apartment six rooms and a bath, or one extra bedroom over the front hall.

The living room and dining room on each floor are separated by a handsome colonnade. The living rooms each have a mantel fireplace, while a sideboard is built into the wall of the dining room, making it thoroughly modern. Shelves for the pantry and a sink for the kitchen are a part of the equipment.

A large rear porch is one of the features not to be overlooked.

The entire building, both upstairs and down, is trimmed with clear, southern yellow pine, suitable for natural finish. All shellac and varnish are furnished by us, as well as sufficient paint for covering and trimming the outside of the building with two coats, your choice of color. Height of ceilings, first floor, 9 feet 2 inches; second floor, 9 feet 2 inches.

Design 154—Size 26½x49 feet, not including porches or bay.

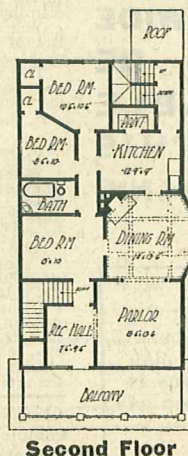

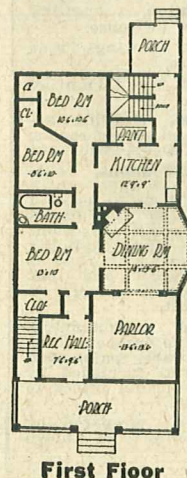

No "Extra" Charges

The list of material sent with every plan lists a sufficient quantity of building material to completely finish each house according to our plans. We guarantee this. There will be absolutely no "extras" required. The total amount of "extras" or unforeseen charges often amount to several hundred dollars in ordinary building. Ask the home owners among your friends.

No Chance for Errors

Our plans have been prepared by practical men and have been proven right. All plans are accurately drawn to a scale and are so plain that any carpenter or contractor can easily understand them.

**A LOT 35 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING**

For \$1688.51 we agree to furnish all the material complete necessary to build this fourteen-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 154.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$3424.00 including labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

This two flat building may be erected upon a lot thirty-five feet wide. Each apartment contains seven rooms and a bath, with the rooms arranged to secure the best possible results from the space occupied.

All rooms are finished in clear, southern yellow pine.

A large cased opening connects the reception room and parlor, while between the parlor and dining room there is a handsome colonnade.

The dining room has modern beamed ceilings and an attractive fireplace mantel. The kitchen has a serviceable sink, and is directly connected with a pantry equipped with the necessary shelving.

Three bedrooms in each apartment are within easy reach of the bath.

It would be difficult to find a better or more comfortable arrangement of rooms in a building of this kind.

We supply all necessary hardware as well as filler, shellac and varnish, also paints for two coats outside.

Height of ceilings, first floor, 9 feet; second floor, 9 feet.

For this reason, with all reversed plans, we also supply the regular stock plan so that all sizes, directions, etc., will be perfectly clear. Our price for reversed plans is \$2.50 per set, including specifications and list of material. This amount to be credited as part payment of your bill, providing your material is ordered from us.

For \$1033.34 we agree to furnish all the material complete necessary to build this five-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 147.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2187.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

An unusually pleasing and well arranged bungalow. Unlike the buildings of this type found in California, our bungalows are erected in a strong, substantial manner that insures comfort even in the coldest weather. They are constructed exactly like other houses found in the northern or eastern states, including building paper, sheathing and floor lining.

This design is one of our most popular buildings. The exterior is unusually attractive and the interior is particularly well arranged. The front porch is of ample size and nicely finished. The living room has a modern beamed ceiling and a comfortable fireplace. This room is separated from the dining room by a large colonnade. A built-in sideboard is a part of the finish in this latter room and is supplied by us as a part of the equipment. A pantry between the kitchen and dining room contains a large cupboard.

Four windows in the kitchen insure plenty of light and sunshine. The basement is reached by stairs leading from this room.

A short hall separates the bedrooms, which are located on each side of the bath, both rooms having plenty of closet space and each closet having an outside window.

The interior trimmings are clear southern yellow pine. All finishing material for interior, as well as paint for exterior, included in our price. Height of ceilings, 9 feet.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 147.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above.

The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Attractive, Comfortable Semi-Colonial Design

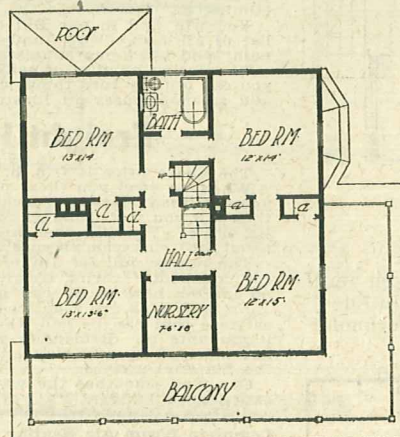

Design 153—Size 34½x33 feet, not including porches or bay.

First Floor Plan

No Time Wasted

Your time and attention may be devoted to ordinary duties while the work on your new home progresses. Building need not interfere with your work. There will be no reason for worry or loss of time. You may rest secure in the knowledge that your home will be built right if built according to our plan.

Second Floor Plan

\$1717.37

Read
Page 64

For \$1717.37 we agree to furnish all the material complete necessary to build this nine-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 153.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$4298.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

The stateliness and quiet dignity of this residence will appeal to the real home lover who requires a large home. It has many features to commend it, not the least of which is the unusually large, comfortable porch extending across the front and eighteen feet back on one side of the building.

The library has a specially designed fireplace with bookcases and seats on either side. The main stairway leads from the reception hall, but a short flight of steps to the first landing makes the second floor easily accessible from the kitchen. There is a large colonnade between the reception hall and living room and a handsome mantel fireplace in the latter. A sink in the kitchen and two cases with work table in the pantry are a part of the material furnished by us.

There are four large bedrooms, also nursery and bath on the second floor. Each bedroom has a closet, and there is an extra linen closet in the main hall.

This is a large building, but the arrangement and compactness of the rooms makes it an easy one to keep warm and cozy.

The entire building is finished inside with clear southern yellow pine. All filler, shellac and varnish as well as sufficient paint for two coats outside, your choice of colors, are furnished by us. Height of ceilings, first floor 9 feet; second floor 8½ feet.

Attractive Bungalow with Ideal Floor Plan

\$985.31

**Read
Page 64**

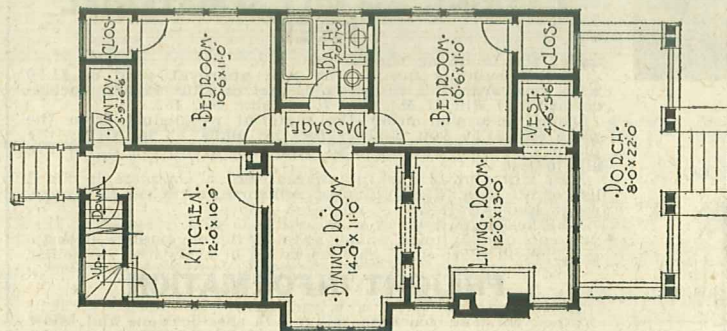

Design 157—Size 24x40 feet, not including porch or bay.

Deal With a Reputable House

The satisfaction of dealing with a reputable house is immeasurable. Prompt service and guaranteed qualities are assured.

Every detail of our business is in charge of an expert who is at your service during every phase of your home building. We shall gladly and freely give you the benefit of counsel or advice at any time, should you find it necessary. Do not hesitate to write us.

Our Specifications

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple economical basis which may be thoroughly understood before any work is begun.

**A LOT 32 FEET WIDE WOULD BE SUITABLE
FOR THIS BUILDING**

For \$985.31 we agree to furnish all the material complete necessary to build this five-room bungalow, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our Plan No. 157.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities but by allowing a fair average price for these items this house should be built for not to exceed \$1740.00, including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

An Ideal Floor Arrangement

The problems of designing a comfortable, five room bungalow are successfully accomplished in this attractive home. Architects, builders and home-lovers pronounce it one of the best arranged buildings of the kind ever designed. Every square inch of space is utilized to the best advantage.

Entrance is effected through a small vestibule, overcoming the objection of walking directly from the Porch to the Living Room. The Living Room and Dining Room are separated by our colonnade No. 863, with bookcase pedestals. The fireplace is made of brick, but we supply the mantel shelf and brackets.

All rooms are well lighted by plenty of windows having divided top lights. Even the closets have outside windows. The sleeping rooms and bath occupy one side of the house and are completely separated from the main living rooms. A large floored attic is reached by stairs ascending from the kitchen. If you so desire this may be finished into a large room measuring 10x40 feet.

The entire first floor is finished with Clear Southern Yellow Pine. Shellac and varnish for interior and all necessary paint for two coats outside furnished by us. First floor ceilings are 8 1/2 feet high. Bathroom has medicine cabinet No. 460. All interior doors have 2 panels, our No. 414. Hardware is of our Monarch design.

Design 158—Size 24x42 feet, not including porches or bay.

THE
TREMENDOUS
SAVING

we offer is of the utmost importance to builders. Our immense organization and exceptional facilities makes it possible to place before the home builders of America an opportunity to build comfortable and artistic homes at reasonable prices. We secure you from being held up by your local material men.

THE COST OF YOUR HOME

is entirely settled before you spend a single dollar for building material, when following our plan. When we send working plans and specifications we state our price on all material including freight charges. You know exactly what the cost will be when goods are laid down at your station, freight prepaid. Freight charges increase our f. o. b. mill price so little that it will probably surprise you. We secure lowest carload rates.

A LOT 30 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

For \$783.92 we agree to furnish all the material complete necessary to build this five-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 158.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$1393.00, including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

An Attractive, Well Arranged Bungalow

This design, like our other bungalows, is arranged and built to withstand long, cold winters, thereby differing materially from the usual California method of construction.

It possesses a style and character peculiarly its own; its strong, substantial appearance appealing to many who are not ordinarily impressed with homes of this type.

Every room except the bath receives light from two or more sides. All windows have divided top lights as shown in illustration.

The living and dining rooms are large and comfortable and are separated by a large cased opening. The kitchen is large, light and well ventilated. All rooms are arranged for comfort and convenience.

The sleeping rooms each have ample closet space and are situated so that they may be entirely separated from the main living rooms.

All of the interior finish is of clear southern yellow pine with the exception of doors which are clear Oregon fir, No. 415. Ceilings are 8½ feet high. We supply shellac and varnish for interior and Wearwell guaranteed paint for two coats outside. Your choice of colors.

Hardware is of our Monarch design.

OUR SPECIFICATIONS

First Floor Plan

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple economical basis which may be thoroughly understood before any work is begun.

A LOT 40 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING

Second Floor Plan

For \$1220.77 we agree to furnish all the material complete necessary to build this seven-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 103.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2671.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

COMFORT AND BEAUTY COMBINED

make this house a model of what the modern home should be. Great care has been exercised to secure an attractive and harmonious exterior, with a convenient and practicable arrangement of rooms, the result being eminently successful.

One of the most pleasing features is the large, comfortable porch extending across the entire front of the building. The living room is also exceptionally large and cheerful, lighted on three sides with windows. A handsome mantel and seat occupy one end of the living room as do also the first two rounded steps of the main stairway. The stair landing is reached directly from the kitchen also, another desirable arrangement. The kitchen and pantry are well lighted and convenient.

The second floor is divided into four comfortable bedrooms and a bath, the latter being easily accessible. Five large closets supply plenty of closet space. A large, partly enclosed balcony may be used as a sleeping porch if desired.

This entire building is finished inside with clear southern yellow pine suitable either for natural finish or paint, as preferred. Hardware is of our Majestic design. Paint for two coats outside, your choice of color. Shellac and varnish for interior finish.

Page 64

Design 141—Size 35½ x 41½ feet, not including porches or bays.

OUR SPECIFICATIONS

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple, economical basis, which may be thoroughly understood before any work is commenced.

Floor Plan

EASY TO BUILD

When a building is purchased from us the whole operation is confined to a single transaction. Every detail is settled before the work begins and you are relieved of all future worry. You know to the penny just what the material will cost and know that experts who assume all responsibility are behind the work. Qualities and quantities are guaranteed.

A LOT 50 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

For \$1094.24 we agree to furnish all the material complete necessary to build this six-room bungalow, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 141.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2395.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A SOURCE OF SATISFACTION AND CONTENT

The ownership of a bungalow such as is here illustrated will prove a never ending source of satisfaction and content. It is unusually artistic and comfortable, containing large, pleasant rooms arranged particularly for convenience. In a home where all the rooms are on the same floor the housework is greatly lessened—a very important factor to be considered when determining the class of home you shall build.

The front porch is large and pleasant; the spacious living room is furnished at one end with a cheery fireplace, at each side of which are built-in seats. A wide colonnade opening leads from here to the dining room. This room is furnished with a beautiful built-in sideboard, a beamed ceiling and a bay window with another built-in seat. The kitchen and pantry are well lighted and convenient.

The bedrooms and bath are well located and have plenty of closet space.

The entire interior trim is of clear southern yellow pine. Paint for two coats outside, your choice of colors. Shellac and varnish for inside trim and floor.

Height of ceilings, 9 ft.

A LOT 40 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING

Second Floor Plan

For \$928.51 we agree to furnish all the material complete necessary to build this eight-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 101.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2049.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A COZY, ECONOMICAL HOME

Many will find their ideal of a cozy, economical home in this design. The rooms are compact and arranged for convenience. All space has been utilized to the best advantage and has resulted in a harmonious exterior and a comfortable arrangement of rooms.

The spacious front porch will be found very convenient for hammock space and porch furniture, since it is unusually large and roomy.

Our Arkansas front door leads to a vestibule and hall where will be found the main stairway. The dining and living rooms are on either side of the hall and are reached through wide openings, the one leading to the living room being fitted with a beautiful Colonnade No. 736. The dining room has a beautiful fireplace and mantel of our design No. 3366. A bedroom on the first floor is an arrangement that will commend itself to many.

The second floor has three more bedrooms with ample closet space and a large bath, all reached from the main hall.

The rooms are finished in clear southern yellow pine. Shellac and varnish furnished by us. Outside painted two coats, your choice of color. Height of ceilings first floor, 9 ft.; second floor, 8 ft.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 101.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you the plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Complete Warm Air Heating Plant for this building. \$118.60
Complete Steam Heating Plant for this building. 183.47
Complete Hot Water Heating Plant for this building. 251.20

Basement Plan, or plan of foundation.

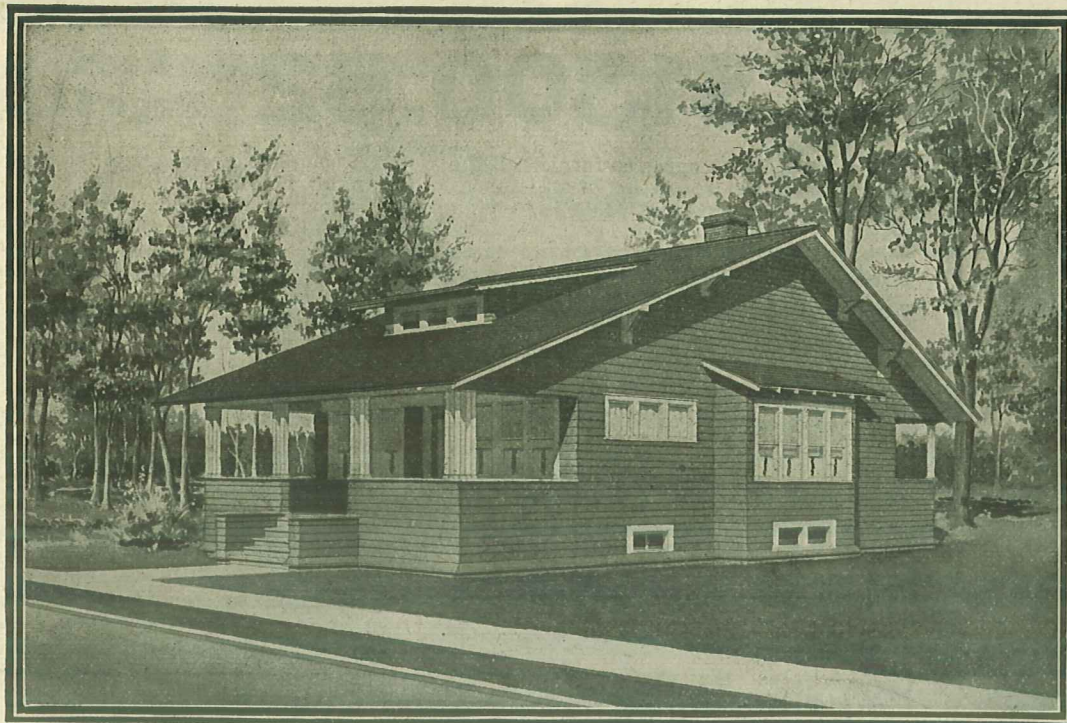

First Floor Plan, showing arrangement and size of rooms, location of doors, windows.

Second Floor Plan, showing arrangement of second story.

Complete Specifications outlining conditions under which the building is to be erected and the quality of material to be used. All directions are clearly and explicitly given in a manner that is easily understood and that will safeguard your interests to the utmost.

Bill of Material, completely listing all the lumber, millwork, hardware, paint and other material furnished by us, at rock-bottom prices to you — the user. Our plans are prepared by licensed architects of known ability.

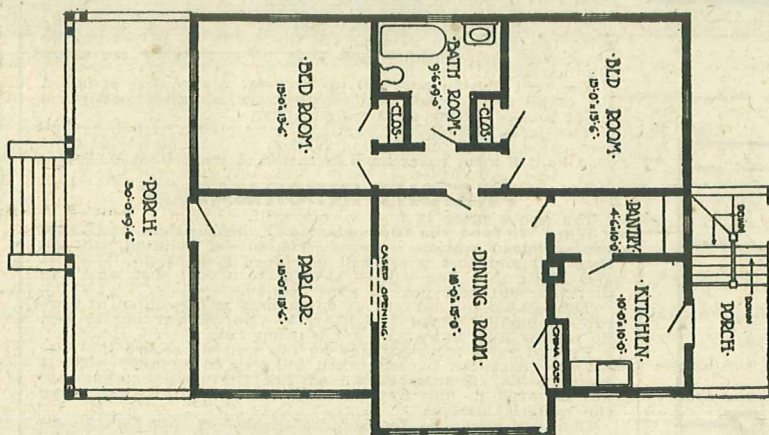

A Conveniently Arranged Bungalow Containing Five Large Rooms

\$1040.44 Read
Page 64

Design 118—Size 32½ x 38½ feet, not including porches.

Our Specifications

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple, economical basis, which may be thoroughly understood before any work is commenced.

Floor Plan

A LOT 40 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

For \$1040.44 we agree to furnish all the material complete necessary to build this five-room bungalow, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 118.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities but by allowing a fair average price for these items this house should be built for not to exceed \$2068.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

ORIGINALITY IN HOME BUILDING

When not carried to extreme, originality in home building is to be commended. It is a manifestation of the spirit that is not bound by conventionalism.

In this bungalow, old ideas have to some extent been disregarded and an effort has been made to combine beauty and comfort in a building that will be appreciated by all true home lovers. The very simplicity of the design will strongly appeal to the discriminating.

The front porch is sufficiently large and well protected to form an out-of-door room during the summer months. A front door of our Illinois design opens into an exceptionally roomy parlor, through which one passes to the dining room. One of the features of this room is the splendid built-in sideboard. The kitchen and pantry are both well lighted and convenient.

All the bedrooms and bath are separated from the main living room and are reached only by a door from the dining room. By many this arrangement is considered ideal. Each bedroom is well ventilated and has plenty of closet space.

The interior finish is clear southern yellow pine. Interior doors are clear Oregon fir. Paint for two coats outside, your choice of color. Shellac and varnish for inside trim and floor.

Modern Two Story Semi-Bungalow Style

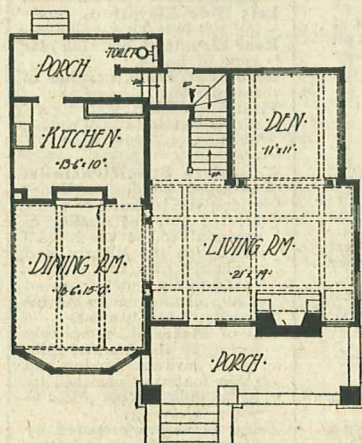

Design 151—Size 36x33 feet, not including porches or bays.

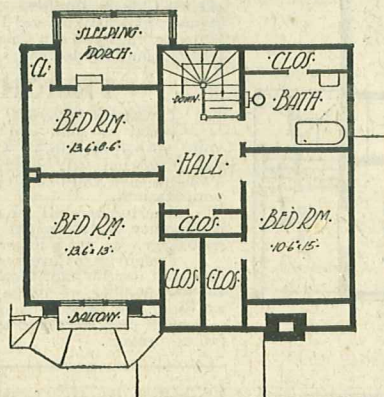

Reversed Plans

Plans for any of our stock designs may be furnished "reversed," that is, the arrangement of all rooms will be just the opposite of that which appears on the original plan, but all printed matter will be backwards. For this reason, with all reversed plans, we also supply the regular stock plan so that all sizes, directions, etc., will be perfectly clear. Our price for reversed plans is \$2.50 per set, including specifications and list of material. This amount to be credited as part payment of your bill, providing your material is ordered from us.

A Lot 50 feet wide would be suitable for this building.

First Floor Plan

Second Floor Plan

\$1300.52 Read Page 64

For \$1300.52 we agree to furnish all the material complete necessary to build this seven room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 151.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this house should be built for not to exceed \$2907.00, including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

The beauty and charm of this comfortable cottage are instantly appreciated by every true home lover. Indeed, it would be extremely difficult to combine its many excellent features in an individually planned home costing much more than our price.

Note the artistic porch from which one enters into the large comfortable living room. Heavy beamed ceilings are found not only in the living room but in the dining room and den as well. The large open fireplace has a charm all its own. The dining room has a built-in sideboard and bay windows. The kitchen has a built-in cupboard and sink.

The arrangement of rooms on the second floor is ideal. Large, well-lighted bedrooms and five ample closets will be appreciated by every housewife. Another important feature here is the sleeping porch directly connected with one of the bedrooms. One of the front bedrooms has a balcony built into the roof.

The entire building is trimmed with clear, southern yellow pine. All necessary filler, shellac and varnish are included in our bill of material.

We furnish sufficient paint of any color to cover two coats. Height of ceilings, first floor 9 ft. 2 in.; second floor 8½ feet.

Second Floor Plan

**A LOT 25 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING**

For \$987.88 we agree to furnish all the material complete, necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tin-work, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 156.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2078.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

Seldom is one able to find so practical an arrangement of rooms, combining the convenience and ample size of those in this building, which is especially designed for use on a narrow lot.

Six comfortable rooms, as well as reception hall, bath, pantry and back entry are contained in its two floors. The front porch as well as an upper balcony extends entirely across the front of the house, and leads directly to the reception hall through an attractive front entrance. The living room has large bay windows facing the front of the house.

A sideboard is built into the wall of the dining room, our No. 464A, a feature demanded by the modern builder. The kitchen has a serviceable sink as part of the equipment furnished by us, and the pantry contains a permanent modern cupboard as shown by design No. 482A in our catalog.

The front bedroom is unusually large, measuring 12 ft. by 19 ft. The other two bedrooms are of ample size and all contain plenty of closet space. The bath at the end of the hall is easily reached from all parts of the second floor.

The entire building is finished inside with clear southern yellow pine. Shellac and varnish are included in our bill of material. Sufficient paint, your choice of color, is also furnished to cover the outside with two coats. Height of first floor ceilings, 9 feet; second floor 8½ feet.

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 139.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$3219.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

THIS IS A SPLENDIDLY ARRANGED HOME

both the exterior treatment and interior arrangement showing thought and care. A comfortable porch extends partly across the front and one side. From here a short vestibule connects with an specially large reception hall, from which a handsome stairway leads to the second floor. A wide colonnade separates the hall and parlor. Sliding doors are placed between the sitting and dining rooms and the parlor and sitting room. A beautiful fireplace occupies one corner of this latter room.

The kitchen and pantry are light and convenient. Arrangements are made to place ice in a refrigerator, located in the pantry, through a small door from the back porch. Stairs from the kitchen lead both to the second floor and basement.

Three bedrooms and bath are located on the second floor. A front balcony is reached from the main hall. Ample closet space is provided.

All interior trim is of clear southern yellow pine. Outside to be painted two coats of any desired color.

Sufficient filler, shellac and varnish to properly finish the interior, supplied by us. Height of ceilings, first floor, 9 ft.; second floor, 8 ft.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Compact, Cozy and Convenient. A Well Designed Home

\$1277.80

Read
Page 64

Design 124—Size 27x40 feet, not including porches or bays.

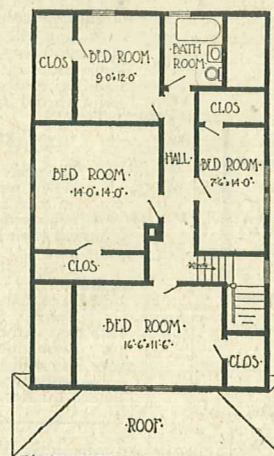

First Floor Plan

THE COST OF YOUR HOME

is entirely settled before you spend a single dollar for building material, when following our plan. When we send working plans and specifications we state our price on all material, including freight charges. You know exactly what the cost will be when goods are laid down at your station, freight prepaid. Freight charges increase our f. o. b. mill price so little that it will probably surprise you. We secure lowest carload rates.

A LOT 35 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

Second Floor Plan

For \$1277.80 we agree to furnish all the material complete necessary to build this eight-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 124.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2893.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A VERY PRETTY HOME

of the cottage style of architecture, with eight large comfortable rooms. Substantial and modern in every detail. A large pleasant porch across the front of the building is a feature that adds much in attractiveness to the appearance of the house. The front door opens into a cozy reception hall from which a handsome stairway leads to the second story. A comfortable seat is built in and forms a part of these stairs.

Many will find the bedroom on the first floor desirable. Sliding doors divide the living and dining rooms while in the latter is built a large china closet. The kitchen and pantry are conveniently located, with stairs leading directly to the basement.

Plenty of closet room will be found on the second floor. All bedrooms are of ample size and open on the main hall, at one end of which will be found the bath.

The interior throughout is finished in clear southern yellow pine suitable for natural finish. Paint for two coats outside, your choice of color. Shellac and varnish for interior finish. Hardware of our Empire design.

A LOT 45 FEET WIDE WOULD BE SUITABLE FOR THIS BUILDING

\$1001.20

Read
Page 64

For \$1001.20 we agree to furnish all the material complete necessary to build this five-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 140.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2126.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A SIMPLY DESIGNED AND HOMELIKE COTTAGE

of five rooms. It would be impossible to secure a more harmonious treatment in a building of this character. The long sloping roof, the large comfortable porch, the partly enclosed balcony are all features that will strongly appeal to lovers of the beautiful.

Nor has the arrangement of rooms been sacrificed to secure a beautiful exterior. One enters directly into a large hall, on one side of which the dining room is placed. On the other side the living room extends along one entire side of the house. This room has windows on three sides and a handsome fireplace, making it light and pleasant.

The second floor is reached by a stairway leading from the main hall, and contains two chambers and a bath. The balcony also may be used as a sleeping porch if desired. Ample closet space is provided.

The basement is reached both from the outside and by stairs leading from the kitchen.

All rooms are finished in clear southern yellow pine. Paint for two coats outside, your choice of colors. Shellac and varnish for inside trim and floor. Height of ceilings, first floor 9 ft.; second floor, 8½ ft.

A LOT 30 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING

Second Floor Plan

\$837.28

Read
Page 64

For \$837.28 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 116.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1963.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

AN EXCEEDINGLY HOMELIKE APPEARANCE

The exterior of this handsome six room house lends an exceedingly homelike appearance to the building. But not only is the outside treatment to be commended; the interior arrangement for a home of this size is ideal.

A large living room is directly connected with a spacious reception hall and dining room by wide openings, giving the interior an appearance of even greater size. From the hall a handsome stairway leads to the second floor. A well lighted kitchen is within convenient distance from both pantry and dining room. The basement is reached by stairs extending from pantry.

The three bedrooms and bath on the second floor open directly into a large main hall. The large tower bedroom is especially desirable, being very cozy and light. A better building for the money would be difficult to secure.

Finished both upstairs and down in clear southern yellow pine suitable for natural finish. Hardware of our Monarch design. Paint for outside, two coats, your choice of color; also shellac and varnish for inside finish.

A Moderate Priced, Cozy Home of Seven Rooms

\$941.96 Read
Page 64

Design 134—Size 24x42 feet, not including porch.

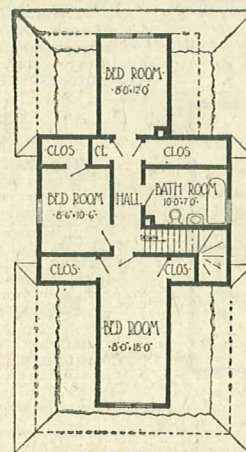

First Floor Plan

EASY TO BUILD

When a building is purchased from us the whole operation is confined to a single transaction. Every detail is settled before the work begins and you are relieved of all future worry. You know to the penny just what the material will cost and know that experts who assume all responsibility are behind the work. Qualities and quantities are guaranteed.

**A LOT 30 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING**

Second Floor Plan

For \$941.96 we agree to furnish all the material complete necessary to build this seven-room cottage, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 134.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$2107.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

NO EXCESSIVE ORNAMENTATION

The simple dignity of this comfortable cottage is highly pleasing. There is no excessive ornamentation, no wasted space, no frills. Every square foot of space is accounted for and adds its full share in making a harmonious whole.

The front porch extends across the front of the building and back a considerable distance on each side, which makes it especially large.

The front door of our Chicago pattern opens into a vestibule which leads directly to the parlor, from which room stairs extend to the second floor. The dining room is large and pleasant. The kitchen and pantry are convenient and well lighted.

There are three bedrooms and a large bath on the second floor, all opening into the main hall. A feature that will appeal to the housewife is the unusual amount of closet space, five large closets being located on this floor.

The interior of this entire house is finished in clear southern yellow pine. Shellac and varnish for finishing supplied by us. The outside is to be painted two coats, your choice of color.

A VERY PLEASING HOME OF EIGHT ROOMS

with many excellent features. The dining and living rooms are separated by a wide cased opening, giving these rooms an appearance of even greater size than they actually possess. In entering the house, one passes through a small vestibule before reaching the main rooms. Handsome stairs reaching to the second floor are placed in one end of the living room while, in the dining room one finds a beautiful fireplace. The bedroom on the main floor will be appreciated by many.

On the second floor are four comfortable bedrooms each connected with a large closet. All bedrooms on this floor have cross ventilation. The five chambers in this design make of it a house that will prove very comfortable for a large family.

All interior trim of clear southern yellow pine. Paint for two coats outside, your choice of colors. Shellac and varnish for inside trim and floor. Height of ceilings, first floor 9 ft.; second floor, 8 ft.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 117.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

NO TIME WASTED

Your time and attention may be devoted to ordinary duties while the work on your new home progresses. Building need not interfere with your work. There will be no reason for worry or loss of time. You may rest secure in the knowledge that your home will be built right if built according to our plan.

A LOT 40 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING

Second Floor Plan

ARE YOU GOING TO BUILD?

**Our Plan Makes Building Easy
and Affords You a Big Saving**

CHICAGO MILLWORK SUPPLY CO.'S PLAN IS OF TREMENDOUS VALUE TO INEXPERIENCED BUILDERS

The inexperience of the ordinary builder is a handicap that places him at the mercy of an unfeeling crowd of local material men when his supplies are purchased at home. Friendships are forgotten and he is considered legitimate prey. Obligated to trade separately with dealers in various kinds of building material he soon becomes entangled in a perplexing mass of confusing problems. Difficulties are encountered on every hand. Questions constantly arise and decisions must be made from a fund of knowledge soon discovered to be wholly inadequate to meet the situation. He has not been trained in the complicated details of building and quickly realizes his limitations.

From this point the work is carried on at the cost of ceaseless worry, frequent quarrels and a constantly increasing and unnecessary expense that could have been entirely avoided under our plan.

When a building is purchased from us **the whole operation is confined to a single transaction.** Every detail is settled before the work begins and you are relieved of all future worry. You know to the penny just what the material will cost and know that experts who assume all responsibility are behind the work. Qualities and quantities are guaranteed.

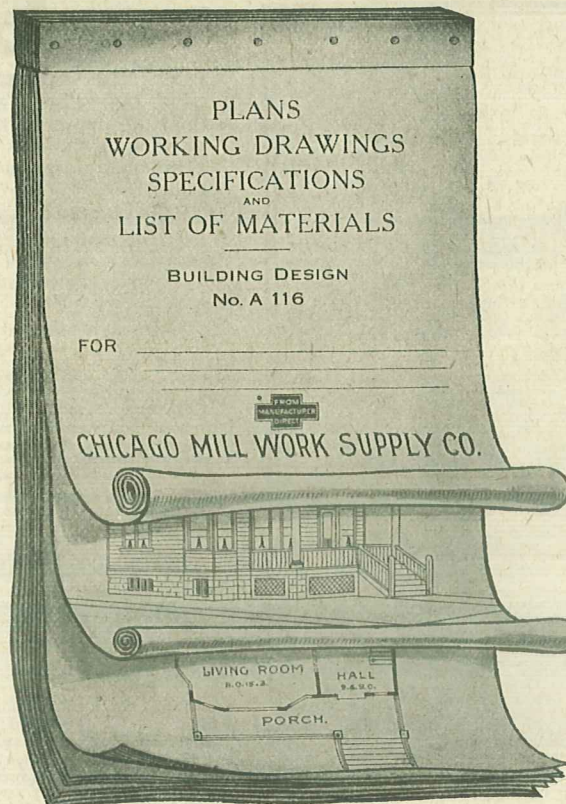

Our plan has proven the most desirable from the standpoint of economy and satisfaction.

Eliminate Worry and Save Time

Eliminate Worry, Save Time, avoid the incessant bother usually considered a necessary part of building.

Our plan makes it easy and safe for you to build without taking your time from other occupations. All your material is purchased from but one source, all arrangements are completed to your entire satisfaction before you pay a single dollar and behind the whole transaction stands our \$10,000.00 bonded guarantee.

Quarrels and unpleasant disputes with your local paint dealer, your lumber dealer, your hardware merchant, your roofer, your stair builder, your glass man, and many other material men are avoided. Ask your friend or neighbor who has passed through the trying ordeal of building what this means to you.

CHICAGO MILLWORK SUPPLY CO.'S PLAN OFFERS AN ENORMOUS SAVING IN DOLLARS AND CENTS

With every set of working blue prints and specifications we send a complete itemized list of all building material necessary to complete the house, consisting of all lumber, lath, shingles, flooring, doors, windows, millwork, finishing material, trim, glass, hardware, sash weights, nails, spouting, guttering, tinwork and painting material. We guarantee a sufficient amount of the above to construct the building according to our plans.

We also tell you exactly what these goods will cost you with all freight charges prepaid by us to your railroad station. After the order is placed there is nothing to worry about, no further bother and no freight for you to pay.

Our iron-clad guarantee covers the amount of material and the quality of all goods. It also guarantees that our price will buy all the material needed. There will be no "extras."

You secure at the very outset a complete set of working plans and specifications that any architect would charge for at the rate of from \$50.00 to \$150.00. This amount is thus available to apply on the purchase price of your home.

Our plan of selling direct from factory to builder will positively save you from one-quarter to one-half the cost of your new home or enable you to build a bigger house for the money you have to spend.

Remember we specify and furnish only the best grades of building material.

Reversed Plans

Plans for any of our stock designs may be furnished "reversed," that is, the arrangement of all rooms will be just the opposite of that which appears on the original plan, but all printed matter will be backwards. For this reason with all reversed plans, we also supply the regular stock plan so that all sizes, directions, etc., will be perfectly clear. Our price for reversed plans is \$2.50 per set, including specifications and list of material. This amount to be credited as part payment of your bill providing your material is ordered from us.

FREIGHT CHARGES

Freight charges are very low. We secure for you the lowest special commodity rate which is exactly the same as that paid by the country's largest shippers. With our plans we send you a letter stating exactly what our material will cost laid down at your station, all freight charges paid by us.

HOW TO SECURE OUR WORKING PLANS, SPECIFICATIONS and LIST of MATERIAL

FREE

Carefully study the designs and floor plans of the buildings shown in this book and select the one that pleases you most.

Then write us telling us the number of the house for which you wish to get plans, and enclose \$1.50 with your request, as a temporary deposit. We shall then immediately send you the plans, working drawings, specifications and complete bill of material. Let us know where the house is to be built or your nearest railroad station and we can then figure the freight and tell you exactly what the material will cost you with freight prepaid by us direct to your town.

When you order the material we shall let the \$1.50 sent us apply as part payment of the order. Thus you secure plans, for which your architect would charge you \$75.00 to \$150.00, absolutely free.

We are obliged to request the small sum of \$1.50 with order for the plans to protect ourselves from curiosity seekers who have no intention of building.

YOU BUILD BUT ONCE — BUILD RIGHT

Make Your Home a Credit to Yourself and Your Community

LET YOUR HOME REFLECT YOUR OWN INDIVIDUALITY

Let your home reflect your own individuality, make it distinctive, let it show something of your own character, make it a home in the truest sense of the word.

Do not depend too much upon the ideas and suggestions of your local architects and builders. They are, in a measure, bound by local conditions, and their ideas are necessarily limited to the use of local stocks of building material.

Our plans have been prepared by some of the best licensed architects in the country, in co-operation with recognized authorities on millwork and building material. Men of wide experience, well and favorably known in the professions and building trades.

Do you realize the immense value of such plans to you? The advantages are tenfold.

1. **These buildings embody many of the best and most modern features and ideas** developed by actual builders in all parts of this country and Europe.

2. **The work is that of practical men.** Nothing is left to chance. All plans are carefully and accurately drawn to a scale and are so plain that any carpenter or contractor can easily understand them.

3. **The possibility of errors is entirely eliminated.** Every measurement is correct, every plan has been proven right. There is no chance for costly mistakes.

4. **The List of Material sent with every plan** specifies a sufficient quantity of building supplies to completely finish the house according to our plans. **We guarantee this.** There will be absolutely no "extras" required. The total amount of such unforeseen charges often amounts to several hundred dollars in ordinary building. Ask the home owners among your friends.

5. **The specifications are complete in every detail** and protect your interests from the time ground is broken until the house is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified; the whole operation is reduced to a simple, economical basis, which can be clearly understood before the work is begun.

6. **Your time and attention may be devoted to your ordinary duties while the work progresses.** Building need not interfere with your work. There will be no reason for

Bill of Material, completely listing all the lumber, millwork, hardware, paint and other material furnished by us, at rock bottom prices to you—the user.

Select the building of your choice and let us name you a price on all material necessary for its construction with all the freight charges prepaid to your station.

worry or loss of time. You may rest secure in the knowledge that your home will be built right if built according to our plan.

7. **The cost is entirely settled before you spend a single dollar for building material.** When we send you the plans we name our price including all freight charges. You know exactly what the material will cost laid down at your station with all freight charges prepaid. The freight will increase our f. o. b. mill price so little that it will probably surprise you. We secure the lowest carload rates.

8. **Beauty, harmony and utility** in the finishings of our buildings are made possible by our enormous stocks of building supplies. An excellent assortment of modern high grade millwork permits us to furnish just the kind of material most desirable for any particular house to set it off properly and make it appear to the best advantage. You are not limited to what your local dealer has in stock when building according to our plan.

9. **The tremendous saving** we offer is one of the most important considerations. The object of our whole immense organization is to place before the home builders of America an opportunity to build comfortable and artistic homes at reasonable prices. We secure you from being held up by a greedy horde of material men.

10. **The satisfaction of dealing with a reputable house is immeasurable.** Prompt service and guaranteed qualities are assured. Every detail of our business is in charge of an expert who is at your service during every phase of your building operation. We shall gladly give you the benefit of council or advice whenever you find it necessary. Do not hesitate to write us.

NO TIME WASTED

Your time and attention may be devoted to ordinary duties while the work on your new home progresses. Building need not interfere with your work. There will be no reason for worry or loss of time. You may rest secure in the knowledge that your home will be built right according to our plan.

**A LOT 30 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING**

For \$745.65 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 137.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1501.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

SPECIAL ATTENTION HAS BEEN GIVEN TO THIS DESIGN

in securing the most room for the least expenditure possible. It has a splendid porch reaching across the front and partly along one side, but aside from this feature an effort has been made to avoid costly ornamentation and useless frills. As a result we have a building that looks well and contains six comfortable rooms at a very moderate cost.

From the front entrance one enters a short, well lighted vestibule which leads to the living room, a comfortable room with a wide front bay window. The kitchen and dining room are on opposite sides of the house separated by a small hall. Enclosed stairs to the second floor start in the dining room.

Stairs to the basement start in the small kitchen hall. One of the features of the kitchen is a built-in cabinet furnished with the millwork.

Clear southern yellow pine forms the interior trim for this house both upstairs and down. It is to be given a coat of shellac and varnish. The outside is to be painted two coats, your choice of color. We supply paint and finishing material.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

A COMFORTABLE AND HOMELIKE LITTLE COTTAGE

This is a remarkably comfortable and homelike little cottage of low cost, and for all practical purposes will be found exceedingly convenient. The living room, dining room and kitchen are placed along one side of the building, leaving space on the opposite side for the sleeping rooms, thus keeping the two divisions separated. Every room in the entire house is well lighted and both bedrooms have cross ventilation. The living and dining rooms are separated by a wide cased opening, giving them an appearance of still greater size. The kitchen and pantry are of ample size and arranged to secure the greatest amount of convenience. Plenty of closet space is provided. Cost considered, this is an ideal little home. The inside is finished throughout in clear southern yellow pine, to be shellaced and varnished, finishing material supplied by us. Outside paint for two coats, any color desired. Hardware of our Monarch design.

Stairway to basement. Attic not finished.

EASY TO BUILD

When a building is purchased from us the whole operation is confined to a single transaction. Every detail is settled before the work begins and you are relieved of all future worry. You know to the penny just what the material will cost and know that experts who assume all responsibility are behind the work. Qualities and quantities are guaranteed.

**A LOT 30 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING**

Second Floor Plan

For **\$838.16** we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 113.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed **\$1933.00** including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

AN ATTRACTIVE EXTERIOR

This house possesses not only an attractive exterior, but a well arranged floor plan. It is of a very popular type and deservedly so since it embodies many of the features of a much higher priced building.

The front porch is large and roomy, measuring 8x20 feet. A handsome front door of our Berwyn design opens into a large reception hall, from which a run of open stairs leads to the second floor. The parlor and reception hall are connected by a colonnade of our design No. 736.

A well lighted pantry opens from a convenient kitchen. Entrance to the basement is secured both from the pantry and from the outside of the house.

The second floor has three bedrooms and a large bathroom. The entire interior of the house, both first and second floor, is finished with clear southern yellow pine suitable for natural finish or paint. Hardware of our Imperial design is used throughout.

Paint for two coats outside, your choice of color. Shellac and varnish supplied for interior finish.

Second Floor Plan

For \$691.02 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 133.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1406.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A CLEAN, COMMON-SENSE BUILDING

that meets with much favor in both town and country. The aim of the architect has been to secure the maximum of comfort and convenience at a moderate expense, which he has accomplished remarkably well.

The wide porch extending across the front and along one side of the building is not only comfortable but adds much in attractiveness. The parlor and dining room are separated by a wide cased opening permitting these rooms to open well together. From the parlor a well constructed stairway leads to the second floor. The kitchen is large and convenient and adjoins the pantry and a roomy closet under the main stairs.

On the second floor are located three bedrooms and a bath, all well lighted and all opening on to a main hall. Plenty of closet space is provided.

The interior both up and down stairs is finished in clear southern yellow pine, and sufficient shellac and varnish is sent to finish properly. Outside to be painted two coats, your choice of color.

For \$805.92 we agree to furnish all the material complete necessary to build this six-room bungalow, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 110.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1631.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

A CHARMING LITTLE HOME

quiet and simple in the exterior expression of the design, compact and economical. The interior arrangement is remarkably effective, a bedroom on the first floor being a feature that commends itself to many.

A commodious front porch extends across the entire front of the house. The front door is of our Idaho design and opens directly into the living room or parlor. A large cased opening separates the parlor and dining room, the latter being well lighted on two sides and having sideboard No. 464A. The kitchen is conveniently placed, light and easily accessible; the pantry large and roomy.

The upstairs rooms consist of two chambers and a bath, all opening into a main hall. This building is on the whole a most serviceable and practical home.

The interior throughout is clear southern yellow pine, to be finished with shellac and varnish. Outside to be painted two coats, your choice of colors. We supply paint and interior finishing material.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 110.

Then when you order the material we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing and thus all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send you these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH WE PREPAY. You will then know to a cent just what the material will cost you at your station.

The lumber bill for any of our houses is forwarded at lowest commodity carlot freight rate. No shipper nor dealer, no matter how large, can get a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder.

Complete Warm Air Heating Plant for this building \$88.31

Working Blue Prints at \$1.50 include the following:

Front Elevation, or front view of house.

Right Side Elevation, showing right side view of house.

Popular Low Priced Home. Six Rooms and Bath

\$835.18 Read Page 64

For \$835.18 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 119.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average for these items this house should be built for not to exceed \$1898.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

AN ATTRACTIVE AND CONVENIENT SIX-ROOM COTTAGE

This is a particularly attractive and convenient six room cottage and is considered by many persons of discrimination and taste as one of our very best offers. The interior arrangement is especially pleasing. From a large porch extending across the entire front of the building one enters the reception hall and from thence through a wide cased opening to the main living room. A convenient coat and hat closet is located in the hall. The living room is large and pleasant with its handsome stairway and built-in seat. A bay window extends across the front of this room. The kitchen and pantry are well lighted and convenient.

There are three spacious bedrooms on the second floor, each with ample closet space. A bathroom on this floor is easily accessible.

All rooms are finished in clear southern yellow pine to be shellaced and varnished, all material furnished by us. Outside to be painted two coats of a color to be selected by purchaser.

Height of ceilings, first floor 9 feet; second floor 8 feet.

EASY TO BUILD

When a building is purchased from us the whole operation is confined to a single transaction. Every detail is settled before the work begins and you are relieved of all future worry. You know to the penny just what the material will cost and know that experts who assume all responsibility are behind the work. Qualities and quantities are guaranteed.

A LOT 30 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING

Second Floor Plan

For \$744.66 we agree to furnish all the material complete necessary to build this six-room cottage, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 129.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1572.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one-half) the cost of the building.

ONE OF OUR MOST POPULAR HOUSES

built along practical economical lines. This home will look well even when erected on a narrow lot. Its appearance is one of great solidity and comfort, and the rooms are arranged with the idea of convenience ever uppermost. The living and dining rooms are placed along one side with the stairs between. A bedroom and large adjoining closet on this floor are features that will appeal to many. The bath room also is on this floor at the foot of the main stairs, within easy reach of all rooms.

The basement is reached by stairs starting from the kitchen.

The bedrooms upstairs are two in number, each with a large closet. Another large attic closet extending the full length of the building is accessible from the second floor hall.

Clear southern yellow pine interior trim is used both up and down stairs. We furnish sufficient shellac and varnish to finish properly. We also supply paint of any desired color, to paint the exterior with two coats.

THE TREMENDOUS
SAVING

we offer is of the utmost importance to builders. Our immense organization and exceptional facilities makes it possible to place before the home builders of America an opportunity to build comfortable and artistic homes at reasonable prices. We secure you from being held up by your local material men.

**A LOT 35 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING**

Second Floor Plan

For \$648.42 we agree to furnish all the material complete necessary to build this five-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 131.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$1319.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

THIS PLAN IS ONE OF GREAT COMPACTNESS

and consequently economical of construction. It has five comfortable rooms including a bedroom on the first floor, a feature desired by many.

The parlor and sitting room are separated by a large cased opening in which curtains may be hung if desired, or it may be left open, practically forming one large pleasant living room across the entire front of the house.

The kitchen and pantry are large and light. From here a flight of stairs leads to the second floor. Both bedrooms are well supplied with closet space.

The entire house is finished inside with clear southern yellow pine, shellaced and varnished. The exterior is to be painted two coats of the color you prefer. We supply paint and finishing material.

This exceedingly attractive little home is sure to please you.

OUR SPECIFICATIONS

are complete in every detail and protect your interests from the time ground is broken until your home is finished. Conditions under which the building is to be erected are fully outlined; grades of material are clearly specified, the whole transaction is reduced to a simple economical basis which may be thoroughly understood before any work is begun.

A LOT 25 FEET WIDE WOULD BE
SUITABLE FOR THIS BUILDING

Second Floor Plan

For \$650.10 we agree to furnish all the material complete necessary to build this six-room house, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 109.

The cost of brick, cement, plaster and labor, which is not included in our price, will naturally vary some in different localities, by allowing a fair average price for these items this house should be built for not to exceed \$1190.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

ANOTHER COTTAGE OF A VERY POPULAR TYPE

the cost of which represents only a comparatively small investment.

The main floor comprises the living room, dining room, kitchen and pantry, the first named being very commodious and comfortable. From this room a very pretty flight of stairs begins. A wide cased opening joins the living and dining rooms. In the latter room a large closet will be found an additional convenience. The kitchen and pantry are both well lighted from the outside.

Two rear bedrooms and a larger front bedroom are found on the second floor. The arrangement of this building permits it to accommodate a larger family than one would suppose to judge from the amount of ground it covers.

The interior both up and down stairs is finished in clear southern yellow pine to be shel-laced and varnished. The outside is to be covered with two coats of paint, any desired color.

We supply paint and finishing material.

THE COST OF YOUR HOME

is entirely settled before you spend a single dollar for building material, when following our plan. When we send working plans and specifications we state our price on all material including freight charges. You know exactly what the cost will be when goods are laid down at your station, freight prepaid. Freight charges increase our f. o. b. mill price so little that it will probably surprise you. We secure lowest carload rates.

**A LOT 35 FEET WIDE
WOULD BE SUITABLE
FOR THIS BUILDING**

For \$394.77 we agree to furnish all the material complete necessary to build this three-room cottage, consisting of all lumber, lath, shingles, flooring, floor lining, sheathing, building paper, doors, windows, trim, millwork, spouting, guttering, tinwork, sash weights, hardware, nails and painting material; everything complete, excepting labor, brick, cement and plaster (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this house according to our plan No. 107.

The cost of brick, cement, plaster and labor, which are not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items this house should be built for not to exceed \$781.00 including the labor and all material complete.

Our total estimate costs are conservative, and these prices will generally save 25% to 40%, and in some locations as high as 50% (one half) the cost of the building.

A SIMPLY DESIGNED LITTLE COTTAGE

with all the rooms on one floor. The great majority of home builders find themselves limited in their selection of a building to one costing some certain amount. When this amount is under \$1,000 such builders should well consider the accompanying plan. We do not know where else greater value could be secured.

The living room, bedroom and kitchen are excellently arranged to secure the greatest amount of comfort and convenience, while the exterior is most pleasing.

A large pantry connects with the kitchen while the bedroom has a closet with plenty of space.

All of the interior trim is of clear southern yellow pine. We furnish shellac and varnish. Sufficient paint is supplied to cover the outside with two coats, your choice of color.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

Bill of Material, completely listing all the lumber, millwork, hardware, paint and other material furnished by us, at rock-bottom prices to you—the user.

Our plans are prepared by licensed architects of known ability.

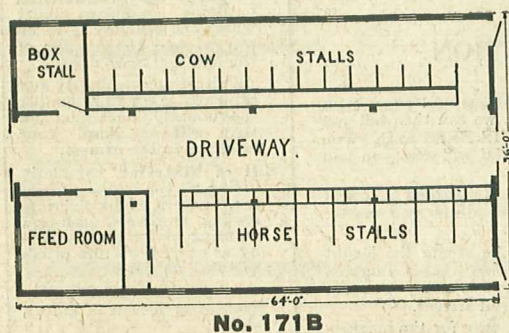

Substantial Stock Barn of Modern Construction

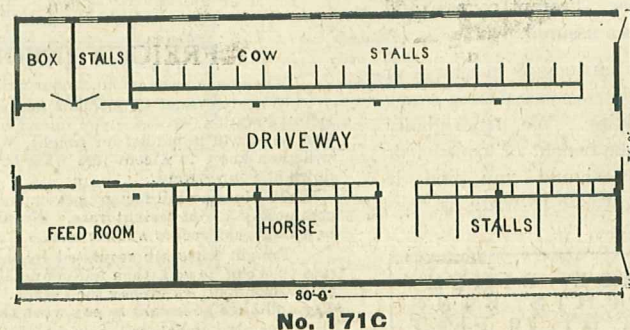

Before Designing This Barn we spent a great deal of time in consulting expert authorities on barn construction to enable us to offer our customers the most modern, economical and substantial barn possible, to meet present farm conditions. It is of the Balloon Joist Frame Construction, which has proven far superior to the old style heavy timber construction with which all farmers are familiar. All timbers are built up and thoroughly braced, admitting of great strength and rigidity. The roof is of the self-supporting type and does away with all posts in the hay mow. The stable ceiling is 8 feet in the clear. The building is unusually well lighted and there are doors at both ends, allowing free passage with a team.

The Hay Mow is adapted to the storage of hay and other fodder and has a capacity of one ton of hay to the foot in length.

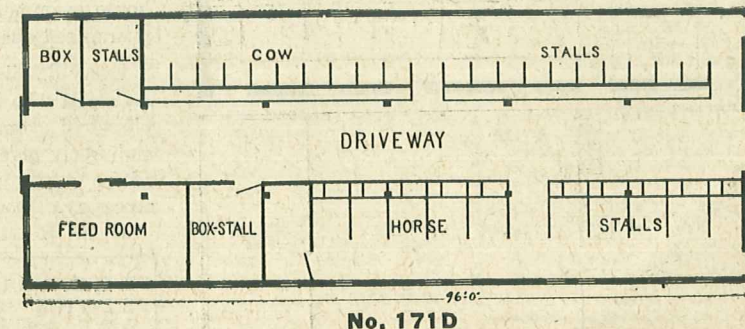

For \$875.15 we agree to furnish all material complete, including lumber, millwork, hardware and paint (except stable arrangement and main floor) to erect this barn, according to our plan No. 171B. Allowing a fair average price for labor, cement and masonry (not furnished by us), the total cost should not exceed \$1,620.00.

For \$1043.06 we agree to furnish all material complete, including lumber, millwork, hardware and paint (except stable arrangement and main floor) to erect this barn, according to our plan No. 171C. Allowing a fair average price for labor, cement and masonry (not furnished by us), the total cost should not exceed \$1,823.00.

For \$1199.97 we agree to furnish all material complete, including lumber, millwork, hardware and paint (except stable arrangement and main floor) to erect this barn, according to our plan No. 171D. Allowing a fair average price for labor, cement and masonry (not furnished by us), the total cost should not exceed \$2,123.00.

36x64 Feet

Design No. 171C

\$1043⁰⁶

36x80 Feet

Design No. 171D

\$1199⁹⁷

36x96 Feet

For the above prices we agree to furnish all the material complete (except stable arrangement and main floor) to build this barn. Our price includes all rough lumber, framing timbers, hay mow flooring, roofing, hardware, sash, doors and painting material. Everything complete except labor, cement and masonry, which we do not furnish.

We guarantee our quantities of material to be sufficient to build this barn according to our plan. The cost of labor, cement and masonry will naturally vary in different localities, but allowing a fair average price for these items, this barn should be built at a cost not to exceed the amount specified over each floor plan.

FREIGHT INFORMATION

The above price is f. o. b. our mill. When we send plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH IS PREPAID. You will then know to a cent just what the material will cost you laid down at your station.

The lumber bill for any of our buildings is forwarded at lowest commodity carlot freight rate. No shipper or dealer, no matter how large, can secure a lower rate.

We offer this barn in a uniform width of 36 feet and in four sizes, namely, 48 feet, 64 feet, 80 feet and 96 feet long. Height to plate, 16 feet.

The stable arrangements shown are offered only as suggestions in our prices, as it is impossible to anticipate the needs of all classes of purchasers.

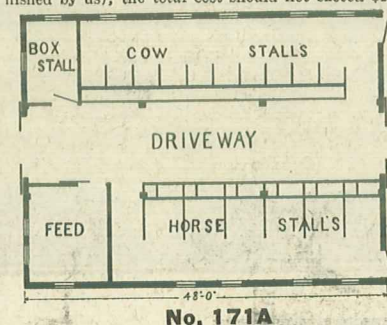

Working Blue Prints, Specifications and Bill of Material Free

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material.

Then when you order the material, we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing, and all architect's costs are eliminated.

For \$711.06 we agree to furnish all material complete, including lumber, millwork, hardware and paint (except stable arrangement and main floor) to erect this barn, according to our plan No. 171A. Allowing a fair average price for labor, cement and masonry (not furnished by us), the total cost should not exceed \$1,333.

Working Blue Prints at \$1.50 include the following:

End Elevation, or end view of building.

Side Elevations, or side view of building showing construction.

Foundation Plan.

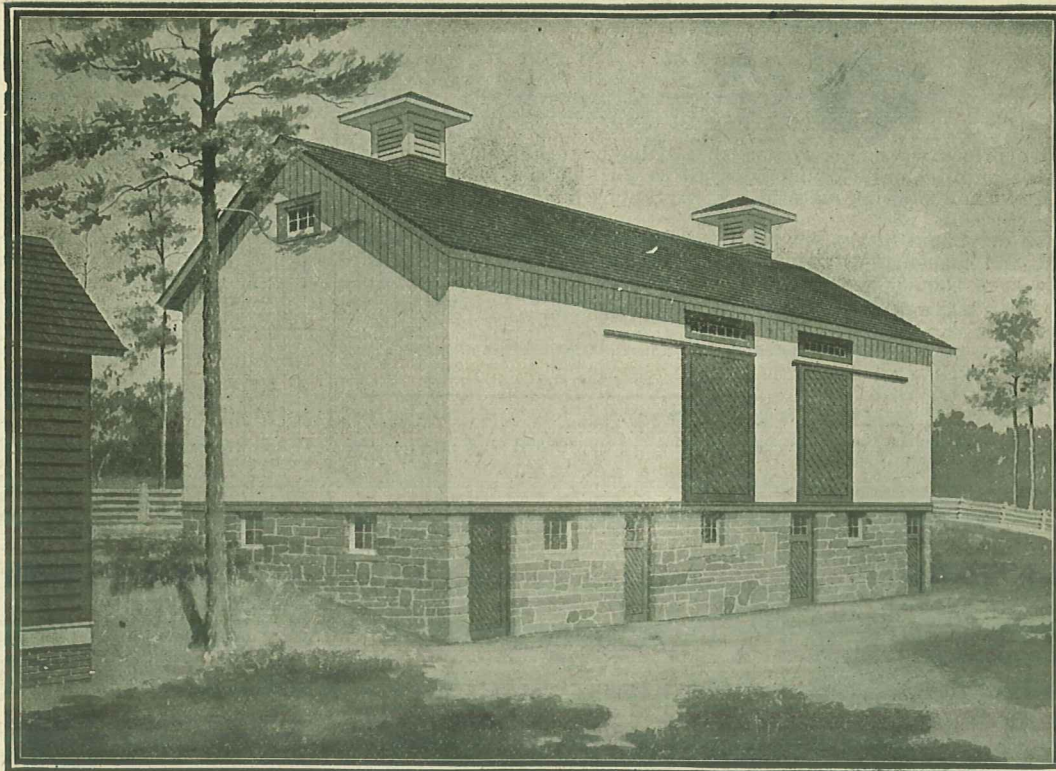

Floor Plan.

Complete Specifications, outlining conditions under which the building is to be erected and the quality of material to be used. All directions are clearly and explicitly given in a manner that is easily understood and that will safeguard your interests to the utmost.

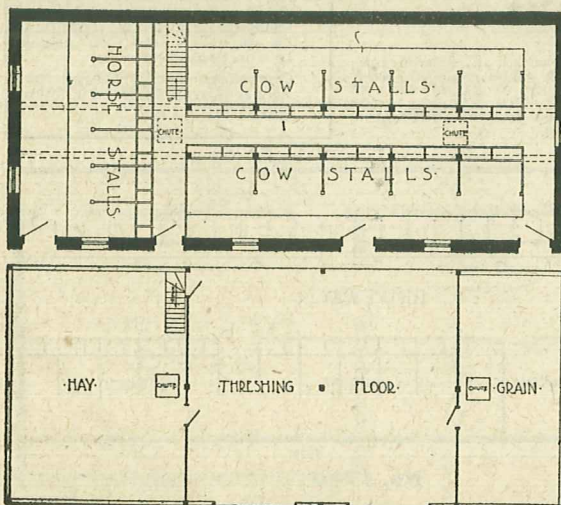

Bill of Material, completely listing all the lumber, framing timbers, plank flooring, roofing, hardware, sash and painting materials, supplied by us at rock-bottom prices to you—the user.

DEAL WITH A REPUTABLE HOUSE

The satisfaction of dealing with a reputable house is immeasurable. Prompt service and guaranteed qualities are assured.

Every detail of our business is in charge of an expert who is at your service during every phase of your building. We shall gladly and freely give you the benefit of counsel or advice at any time, should you find it necessary. Do not hesitate to write us.

THE OUTSIDE DIMENSIONS OF THIS BARN ARE 30 FEET BY 70 FEET

\$1012.02

Read
Page 64

For \$1012.02 we agree to furnish **complete material** necessary to build this barn the outside measurements of which are 30 ft. x 70 ft. consisting of all rough lumber, framing timbers, plank flooring, roofing, hardware, sash, doors and painting material. Everything complete excepting labor, cement and stone (which we do not furnish).

We guarantee our quantities of materials to be sufficient to build this barn according to our plan No. 146.

The cost of labor, cement and stone, which is not included in our price, will naturally vary some in different localities, but by allowing a fair average price for these items, this barn should be built for not to exceed \$1702.00 including the labor and all material complete.

Our total estimate costs are conservative and these prices will generally save 25% to 40% and in some locations as high as 50% (one half) the cost of the building.

A COMPLETE AND VERY PRACTICAL BASEMENT BARN

This is an unusually complete and a very practical basement barn. It is 30 feet wide and 70 feet long. The floor plan shows the arrangement of stalls, etc. This is an unusually substantial barn at a moderate price. We furnish sufficient paint for two coats, your choice of color.

WORKING BLUE PRINTS, SPECIFICATIONS and BILL of MATERIAL FREE

under the following conditions:

If this building meets with your approval, send us \$1.50 with your order for the complete set of Blue Prints, Specifications and Bill of Material for Design No. 146.

Then when you order the material, we deduct from the price the \$1.50 you paid us for the plans, so in reality the plans cost you nothing, and all architect's costs are eliminated.

You will find in our Bill of Material a complete itemized list of all sash, doors, lumber, millwork, shingles, hardware, paint and all items enumerated above. The design number of each article is plainly stated so that you can quickly turn to our catalog for a complete description and in most cases an illustration of every item in the list.

FREIGHT INFORMATION

The above price is f. o. b. our mill.

When we send these plans and specifications and know your railroad station, or where you intend building, we can then tell you just what will be added for freight, WHICH IS PREPAID. You will then know to a cent just what the material will cost you laid down at your station.

The lumber bill for any of our buildings is forwarded at lowest commodity carlot freight rate. No shipper or dealer, no matter how large, can secure a lower rate.

Freight rates are regulated by law and we secure the lowest rate that can be had, then tell you in advance just what it amounts to. Remember, we prepay the freight. You are not annoyed in any way and have no freight to pay when the material arrives.

Our plan smoothes the way and makes it easy for the inexperienced builder

Economy Ready-Built Summer Houses

Attractive appearance One of the principal demands of the prospective owner is that his building shall first of all please the eye. It must be well planned and nicely proportioned. Our Economy Ready Built Summer Houses have been designed by architects who are fully alive to this fact and who have succeeded in combining exterior beauty with interior comfort to a remarkable degree.

Made in sections These buildings are made in interlocking sections. They are fitted complete and the house is first erected in the factory. Every part is made to fit perfectly, and then numbered so that you can easily see just where each section belongs. When the building reaches you all you have to do is to follow our simple directions by bolting all sections together and your house is ready for occupancy.

Simple directions It does not require experienced help to assemble these ready-built-houses. Anyone can follow the simple directions and blue prints we supply and bolt these sections together, in most cases within a few hours after the material is received. All fitting is done at our factory so that the various parts will join perfectly.

Tools needed The only tools needed are hammer, wrench, screw driver and level. These are furnished free with each house.

Easy to erect The plainly marked sections interlock. Each fits perfectly in its proper place and cannot be used elsewhere, therefore, it is impossible to make a mistake. The smaller houses may easily be bolted together by two men within a few hours; the larger buildings require a little more time. The sections we supply are larger than those ordinarily furnished for a ready-made building, which not only simplifies and strengthens the work but also gives the house a better appearance.

Strong and permanent All of these designs are remarkably strong and rigid, in fact they are fully as substantial as any similar permanent building and will easily withstand the most severe storms. They are intended as permanent buildings but may be easily taken apart and moved when necessary.

The building is complete Our price represents the entire cost of the building. Everything is included except a few hours of common labor, which is almost insignificant. You can move in just as soon as the house is assembled from the material we supply.

No extras This is an important consideration. You know before spending one penny just what each building will cost complete. Everything necessary to construct the house is supplied. We guarantee that there will be no extra material needed to complete the houses.

Every part fits perfectly This insures tight, weather proof joints, through which the most severe rain storm cannot beat. An even, comfortable temperature may be maintained within even during the coldest weather.

Finest materials used Nothing but the finest lumber and building material is used to construct our Economy Ready Built Summer Houses. Carefully read the specifications on this page. We do not use wreckage, old weather-beaten stock, nor inferior material of any kind. Everything is bright, clean and brand new. We guarantee that all material will be first class and exactly as represented.

Looks like a permanent building Our Ready Built Houses

have the appearance of permanent buildings, which they are in reality, since very few are ever moved after the parts are first assembled. The sections are built 6 ft., 8 ft. and 10 ft. wide where possible, which not only adds to the appearance, but also makes the building much stronger than one built with narrow sections.

May be made permanent A large proportion of these buildings are used as permanent homes. They are more substantial, and are much stronger than the ordinary building of equal cost. When intended as a permanent residence the house is often lined with Monarch Wall Board, described on page No. 90. This forms double outside walls and makes the building as snug and warm as any house erected right on the ground.

Substantial as the house you live in The fact that these buildings are made in sections and are Ready Built does not in any way mean that they are less substantial than a building erected in the ordinary way. In fact, they are stronger, better and more rigid than any ordinary house you could possibly build for the same amount of money.

Uses

Dwellings,
Bungalows,
Children's Play
Houses,
Contractor's Offices,
Stores,

Boat Houses,
Bath Houses,
Hunter's Cabins,
Restaurants,
Real Estate Offices,
Studios,

Plantation Cabins,
Summer Cottages,
Voting Booths,
Or any purpose you
desire.

Not "ready-cut" These are not "ready-cut" houses, in which the lumber is cut and fitted only. They are "ready-built," finished and complete in sections. You do not need a carpenter to put them up. You or your handy man can bolt together the sections with but the four tools we furnish free.

Foundation We furnish cedar posts to be driven into the ground on which the building rests. The building is fastened to these posts by iron anchors and heavy lag screws. If you want a brick or concrete foundation you can have it built at a small additional cost.

Paint and hardware The exterior of the building is given one coat of good gray paint. If you desire additional paint it may be selected from page No. 193 at the prices quoted. All hardware is of the best quality and is fitted complete as part of the equipment.

Move in the day house is received There will be no long delays while our Ready Built houses are being bolted together. In most cases you can actually move in the day your building is received.

Quick shipments Ordinarily we can make shipments within a week after receiving your order. The smaller houses require less time and the larger buildings a little more. You will suffer no inconvenience because of delays while the order is in our hands.

Low freight rates Our Ready Built houses are shipped direct from factory in southern Michigan, and are classed as manufactured lumber, consequently take a low freight rate. Our price is F. O. B. factory. When we know the design you want we can quote you a delivered price on all material complete, laid down at your railroad station.

BLUE PRINTS FREE

With each house we furnish free a complete set of blue prints, showing all elevations and floor plans. If you wish these plans before your order is placed we can supply the set for \$1.00. Then, when you place your order, this \$1.00 will apply as part payment of the house so that the plans will cost you nothing.

SPECIFICATIONS

All our Ready Built Houses are built on the same general specifications. All lumber used is No. 1 grade Yellow Pine, thoroughly seasoned and kiln dried.

FOUNDATIONS—Cedar Posts for house to rest on are furnished with each building.

SILLS—3x8 in., with base and watertable, in all buildings except chicken house, in which 3x6 sills are used.

STUDDING—2x2 in., dressed all sides.

RAFTERS—2x3 in., dressed all sides.

JOISTS—2x6 in. or 2x4 in., to suit size and style of building, hung in patent steel stirrups.

FLOORING— $\frac{3}{4}$ x3 $\frac{1}{4}$ in. face, dressed and matched, Yellow Pine.

ROOF BOARDS—No. 1 Yellow Pine; dressed, matched and beaded on under side and nailed to rafters, forming roof in sections.

SIDING— $\frac{1}{2}$ x6 in. Drop Siding, nailed to studding to form wall sections in 6, 8 and 10 ft. lengths.

PARTITION WALLS— $\frac{1}{2}$ in. Ceiling; dressed, matched and beaded on one side and dressed on other side; made in sections 8 ft. high and in lengths to suit location of doors.

HEIGHT OF WALLS—8 ft. from floor to plate line.

FRAMES—Window and door frames made of best grade of lumber and first class workmanship and already set in wall sections.

DOORS—Of proper size and fitted with necessary locks and hinges.

WINDOWS—Glazed with best American glass and fitted in frames with patent sash locks.

HARDWARE—All locks, hinges, sash fasteners, bolts, heavy lag-screws and tools necessary for erection and completion of building furnished with each order.

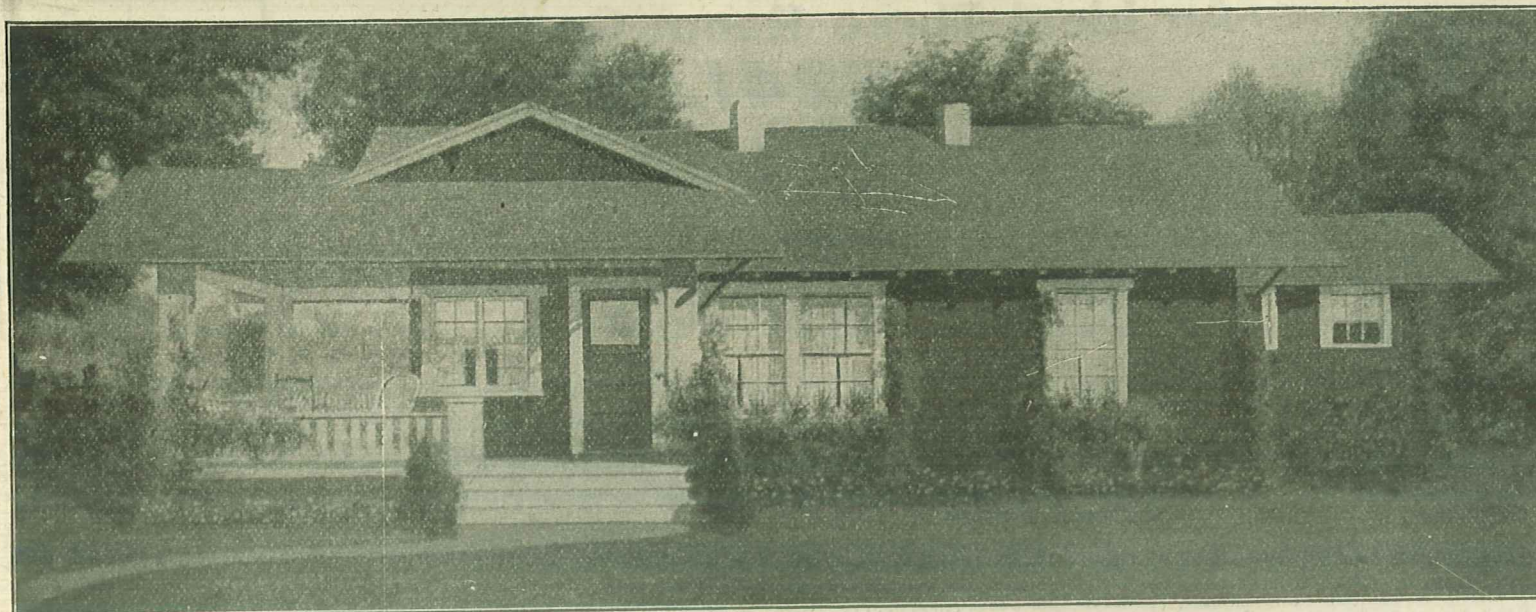

ROOFING—Best grade of Economy Rubber and Chipped Slate Roofing furnished in rolls.

PAINTING—Outside of buildings given one good coat of high grade gray paint, which forms a very good foundation for additional coats of paint of any color, when needed. Interior left in the natural color, which can be finished by purchaser in any manner desired.

Strong—Substantial

Artistic—Comfortable

Economy Ready-Built Summer Houses

Design No. 169

\$718.25

For this Beautiful
Summer Cottage

COMPLETE

In sections ready to bolt together. This building may be erected and ready for occupancy within four or five days after the material is received.

Specifications

The complete specifications for this building are shown on page 59. All lumber used is No. 1 grade Yellow Pine, thoroughly seasoned and kiln dried.

FOUNDATIONS—Cedar posts for house to rest on are furnished with each building.

SILLS—3x8 in., with base and watertable.

STUDDING—2x2 in., dressed all sides.

RAFTERS—2x3 in., dressed all sides.

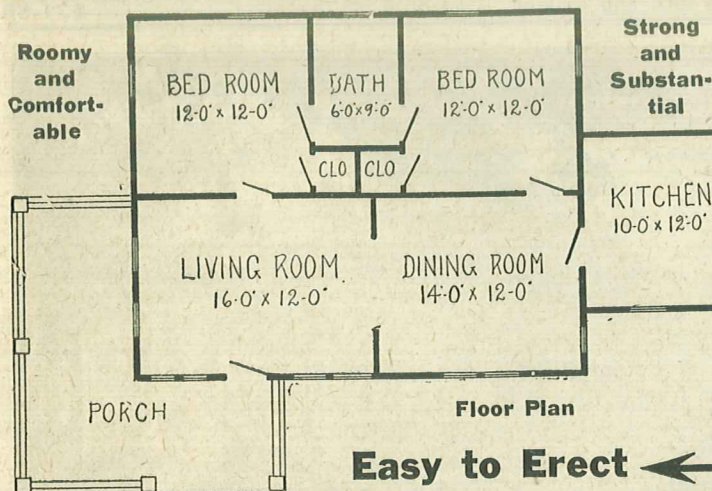

JOISTS—2x6 in., hung in patent steel stirrups.

FLOORING— $\frac{3}{4}$ x3 $\frac{1}{4}$ in. face, dressed and matched, Yellow Pine.

Blue Prints Furnished
FREE
with each order
Delivered Prices will
be quoted at your
request

All sections are made to interlock and will fit together perfectly. The simple directions and blue prints we supply make expert labor unnecessary. You and your handy man can easily and quickly bolt the plainly numbered sections together. Only four tools required—hammer, wrench, screw driver and level. These are furnished free with each building.

An Artistic Summer Home

This exceedingly attractive and comfortable building makes an ideal summer home, in fact, it is frequently used as a permanent residence, as shown in the accompanying illustration. It is strongly and substantially built in interlocking sections at our factory, and all parts are assembled and fitted. Then every section is plainly marked and carefully packed and crated so that when the building reaches you it is only necessary to reassemble the parts and follow our simple directions by bolting the sections together. Everything is included in our prices. There will be no "extras" whatever.

The outside of this building measures 24 ft. x 40 ft., and the comfortable porch, which extends around one corner, 8 ft. x 30 ft. The porch steps shown in the illustration are not furnished by us since they are seldom necessary. Neither does our price include the metal chimneys, although we can furnish the latter when wanted at \$1.25 each.

Every room in the house has windows on two sides, insuring plenty of light and good ventilation. Each bedroom has a closet of ample size. Plumbing and bathroom equipment not considered as a part of the building, consequently, not included in our price. This may be selected to suit the requirements of the individual customer from page 60.

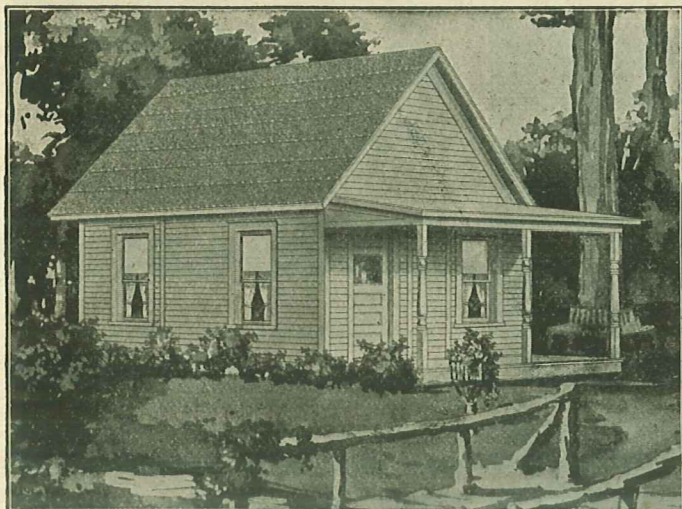

With the exceptions noted, we supply everything complete, and when the building reaches you it may be easily and quickly bolted together with a little help and will be ready for occupancy within three or four days after it is received.

Prices for Building Complete

Auto Garage—Ready Built—\$80⁰⁰ AND UP COMPLETE

Substantial—Permanent—Ornamental

If Your Automobile is kept in a public garage the rent you are charged will pay for one of these buildings within a few months. They are unusually attractive in appearance and are so strongly and substantially built that with ordinary care they will last a lifetime.

Each Garage is Furnished Complete

in sections and can be bolted together by yourself or your handy man within a few hours. All hardware, sash locks, bolts and heavy lag screws that permanently bind the building together are supplied by us as part of the regular equipment.

We Guarantee These Garages to be strong and substantial. They are intended as permanent buildings but may, when necessary, be easily taken apart and moved without injury.

Woodwork Painted Outside with one coat of good gray paint. For \$2.00 extra we will furnish sufficient white paint for trimming and lawn green for outside body to cover one extra coat. Other colors of your selection will be furnished at the same price, if preferred.

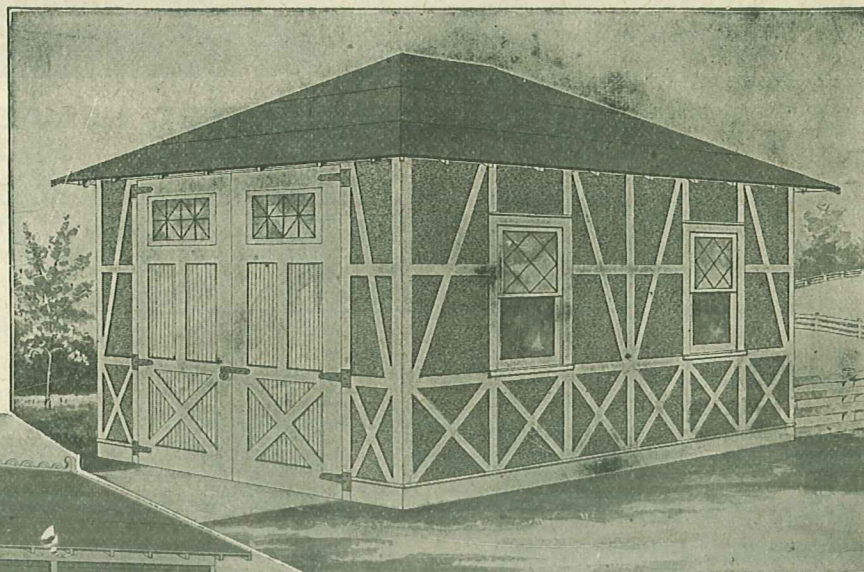

The Attractive Appearance

of these garages makes it possible to use them in the finest residence districts. They were designed by architects who fully appreciate that in a building of this kind, beauty of design is second only to strong, substantial construction.

Freight Prepaid Prices will be submitted and take low freight rates as follows: East of Chicago, second class; west of Chicago, third class; south of Ohio River, fourth class. Freight charges are so low that they will add but little to the cost. All ready built garages shipped direct from our factory in southern Michigan.

ECONOMY RUBBER ROOFING

GUARANTEED ROOFING, SMOOTH MICA FINISH

THE THICKEST, HEAVIEST AND MOST DURABLE SMOOTH FINISHED ROOFING

You Will Find Our Economy Rubber

Roofing ½-ply heavier than any other smooth finished roofing manufactured. Our 1½, 2½ and 3½-ply Economy Rubber Roofing is 5 pounds heavier to the square than the usual 1, 2 and 3-ply.

This Roofing Will Outwear tin, tar or gravel. It is made of heavy, strong, long fibred felt, thoroughly saturated with the very best quality of asphalt and finished with ground mica. We are so confident that this roofing is the best roofing of the kind now on the market, that we stand behind it with an absolute guarantee.

Economy Rubber Roofing is weather proof, fire-resisting. It is elastic, tough and pliable. It is not affected by changes in climate, steam, gas or vapor and will not rust. It is free from odors, and will not discolor rain water.

Anyone Can Apply this roofing, the only tools required being a knife and hammer.

Economy Rubber Roofing will wear 25 per cent longer than roofing offered you at much higher prices by retail dealers.

FREE FROM COAL TAR PITCH

There Is No Coal Tar Pitch used in this roofing. Only the best of pure asphalt is used. Our Economy Rubber Roofing is made from honest, dependable material and is guaranteed for periods of from 5 to 10 years, depending upon the thickness. With proper attention it will last much longer.

Compare These Prices with others, then compare the quality of our roofing and remember that we can show you a saving of from one-third to one-half over cost of other roofing.

WRITE FOR FREE SAMPLES OF THE ROOFING ITSELF

WATER PROOF

Make a pan out of a sample by bending up the corners and fill with water. It will hold water until it evaporates—showing that it will not rot and that it is as waterproof as any there can be.

It's a Proven Fact prepared roofing of our quality will outlast shingles, and aside from the fact that it is FIRE PROOF—WATER PROOF, is better and cheaper than tin, tar and gravel, or any other kind of roofing and will outwear them all—this ought to convince you to buy when it can be bought at a fraction of their cost.

High Class Residences bungalows, cottages, modest homes, barns, sheds, and outbuildings of all kinds may be covered with Economy Rubber Roofing with results that will more than meet the expectations of the owner and at a price that will prove a very substantial saving.

May Be Laid Over Old Shingles with excellent results. When wanted for this purpose your order should so state so that we can supply you with extra long nails. There is no extra charge for these long nails.

Economy Rubber Roofing is odorless, nothing being used in its composition that will affect or discolor rain water. Lasts longer than shingles and costs half what shingles cost.

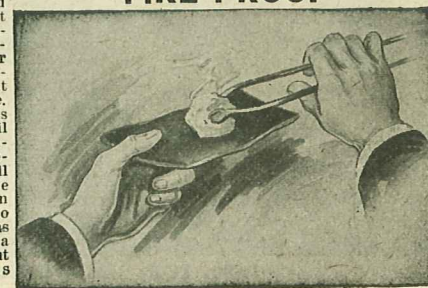

May Be Applied in Winter or Summer without danger of expanding, contracting or buckling, a feature which cannot fail to be appreciated by people experienced in the roofing business.

Samples Free Samples of Economy Rubber Roofing are put up in convenient form for mailing. If you want to set and test this roofing, send for a free sample.

3½ PLY
225
PER
ROLL

FIRE PROOF

Place a red hot coal or a lighted match to the flat surface of a sample until it nearly burns your fingers. The sample will not light or catch fire. The only effect is to soften and boil up the rich water-proofing properties, which will return into the felt. It takes an intense heat to even do this, as the flame from a match is about 1,800 degrees Fahrenheit.

Guaranteed Wearwell Paints

Always give name as well as number of color wanted.

HOUSE PAINT

Our Wearwell Brand of House Paint is positively guaranteed to give perfect satisfaction. It is manufactured under the supervision of expert paint chemists and has proven, by many years of actual test, to be a perfect paint.

The Ingredients used in its composition are of the highest standard of quality and are combined in exactly the proper proportions to insure ease of application, greatest covering capacity and extreme durability. The colors used in preparing the various tints, shown on our Color Chart (page 194), are selected with special care and are in all cases the best obtainable—a fact which insures the maximum of permanency.

Our Wearwell Paint Has Been Made

under the same formula for over 15 years and has been used by painters as well as by inexperienced men. After preserving a record of actual results obtained, we are so convinced that this is the **BEST and ONLY** paint that can be safely used by anyone, however inexperienced in house painting, with most satisfactory results, that to show our confidence in this, the **very best paint on the market**, we will protect you by the strong guarantee shown on this page.

Inside Painting

Wearwell Paint is not only the best paint for outside work, but is a perfect and sanitary paint for inside use—kitchen walls, bedrooms, bathrooms, pantries, etc., painted with it can be washed and kept clean the year round. It is made in pretty, delicate tints for inside use.

COLOR COMBINATIONS

One of the principal things in color harmony is the selection of colors which will tend to blend one into the other. Bright, glaring colors, such as green and blue, should not be used together; nor should bright red and blue. The following combinations are always pleasing and harmonious. The selection, however, must be governed somewhat by the surroundings:

- No. 1. Steel Gray, trimmed with White
- No. 2. Green Stone, trimmed with White
- No. 3. Buff, trimmed with Green Stone
- No. 4. Light Salmon, trimmed with Autumn Leaf

are extremely durable combinations and will last for years without becoming tiresome to the eye. Never select Cold Grays and Green in combination; in a short time these colors will become

irksome—a condition which never exists with soft warm browns.

How Much Paint You Need

Measure the length, width and height of the building; add together the total number of feet in the two sides and two ends; then multiply this amount by the number of feet high, which will give you the total number of square feet to be painted. Make no allowance for doors or windows; figure as if for a solid surface. Divide the total number of square feet by 250, which is about the number of square feet one gallon of our paint will cover—two coats—the result will give you the number of gallons of paint required (see table).

Wearwell Paint will cover from 250 to 300 square feet, two coats, to each gallon.

EXAMPLE

Suppose your building measures 20 feet wide, 30 feet long and 20 feet high—

Front	20 feet
Back	20 feet
One Side	30 feet
One Side	30 feet
Total	100 feet
Multiply by	20 feet
Height	2000 sq. feet

GUARANTEE

We hereby guarantee our Wearwell Guaranteed House Paint to give perfect satisfaction if used according to our simple directions, and we agree to furnish new paint free of charge to replace any Wearwell Guaranteed House Paint which does not prove satisfactory.

A High Grade Paint For Every Purpose

Wearwell Barn and Roof Paint

Wearwell Barn and Roof Paint is the best paint in the world for barns and all outbuildings. It is made scientifically of the best minerals ground by heavy machinery in a specially treated linseed oil—rich in color, wears like iron and is a perfect preservative for the wood. It is absolutely weather and waterproof. Makes no difference if applied to wood or metal surfaces; we guarantee satisfaction. Specially adapted for metal and shingle roofs, bridges, rain pipes, gutters, cornices, etc. Prevents the metal from rusting. New metal or galvanized roofs are

in most cases greasy. This must be thoroughly cleaned with benzine before applying the paint.
MADE IN THREE SHADES.

No. B4073. Red.
No. B4074. Gray.
No. B4075. Brown.

PRICES:

Wearwell Porch and Step Paint

Wearwell Porch and Step Paint dries very hard, but is at the same time elastic enough to resist all changes in temperature. Winds, rains and storms will not affect it. It is made from a specially treated Linseed Oil to which it owes its extreme durability. Do not use an inside floor paint for outside use as they are not intended for such work. Wearwell Porch and Step Paint is made in six practical and attractive colors, as follows:

P11. Slate. P30. Stone.
P17. Gray. P36. Sage.
P70. Terra Cotta.

Wearwell Wire Screen Paint

Ready for Use Easy to Apply
Does not Clog the Meshes

Two shades: No. 4065 Green, No. 4066 Black.

One coat of Wearwell Screen Paint completely renovates old rusty screens and gives a brilliant and lasting finish. Before putting your screens up paint them with this paint. They will last twice as long. Apply with a 1½ or 2-inch Flat Varnish Brush.

Wearwell Floor Paint

Wearwell Floor Paint is made especially for floors. In it are combined the most durable and wear-resisting materials known to the paint chemists. It will withstand the hard knocks to which floors are subjected. Wearwell Floor Paint is made to wear. Unequaled for painting Kitchen, Dining Room and Bed Room floors. It also makes an ideal border paint around rugs in any room. Wearwell Floor Paint should not be classed with the many cheap and worthless floor paints on the market. No better floor paint can be made. Anyone can apply it however inexperienced in painting.

¼ Gallon Cans Per Can 36c

Wearwell Shingle Stain

Is made of genuine creosote oil and will preserve your shingles better than any other stain on the market. Creosote oil is the greatest wood preservative known. This stain penetrates further and does not evaporate, nor is it affected by the sun's rays, as is the case with shingle stains made of composition oils. It effectually prevents absorption of moisture and renders the surface proof against decay, whether exposed to the elements or to dry rot. We recommend that shingles be dipped in stain before being laid. By dipping, both sides of the shingle are better preserved, as the stain penetrates into all parts of the wood. When dipped about 2½ to 3½ gallons will cover 1,000 shingles. Only two-thirds of the shingle need be dipped. Brush work should have two coats to completely saturate the wood. One gallon will cover about 100 square feet two coats.

WEARWELL Guaranteed Varnish

Outside Spar Varnish

No. 5204. A high grade Varnish for finishing outside doors, store fronts and all surfaces exposed to the weather. We also recommend its use for finishing window sills, inside blinds, or any woodwork subjected to dampness. Never use an inside varnish for outdoor use. It is not intended for such work. Where used, it soon loses its lustre, then cracks and peels. Our Wearwell Outside Spar Varnish is especially made for outdoor use, is weather-proof, dries free from dust in 8 hours, and hardens in 3 days.

Durable Floor Varnish

No. 5200. No varnish receives such hard wear as a floor varnish. Furniture is pulled back and forth over it. It must resist the hard pound of the heel. The best varnish that can be made should only be used as a floor covering. Wearwell Durable Floor Varnish meets all floor requirements. It is especially prepared to withstand the hard knocks to which floors are subjected. It is very elastic, durable and waterproof. It will not mar or scratch white and, what the housewife appreciates most, varnished floors are easily kept clean. Works easily, hence anyone can put it on. Dries hard over night with a fine gloss. One-half gallon will cover an ordinary floor—two coats.

Wearwell Extra Interior Finish

No. 5201. This varnish is made of the highest grade materials and is intended for very fine interior work and on all woodwork where a good, durable and serviceable finish is required. It flows and works easily, dries over night with a fine gloss, and can be rubbed to a dull finish in three days if desired. This varnish, under the manufacturers' name, retails at \$3.00 per gallon.

CABINET WORKMANSHIP UNEXCELLED

AN UNUSUAL PRICE BARGAIN

The Simplicity

and attractiveness of these Colonnades are the qualities to which may be attributed their chief hold upon popular favor. They are built by skilled workmen in accordance with correct architectural principles, from carefully selected and thoroughly kiln dried lumber.

The Round Columns are made with a lock joint and measure 6 in. in diameter at the base, 5 in. at the neck. These designs will be found appropriate for almost any position where a colonnade may be used and are guaranteed to give satisfaction.

HIGHEST GRADE CABINET WORK

Finish

When ordered "finished" we apply one coat of filler and two coats of Wearwell Extra Interior Varnish. Natural finish is always supplied on a finished colonnade unless a special stain or color is ordered. When it is desired to match the shade of your interior finishings we must have a sample.

ONE OF OUR MOST POPULAR DESIGNS

An Exceptionally Pleasing Design

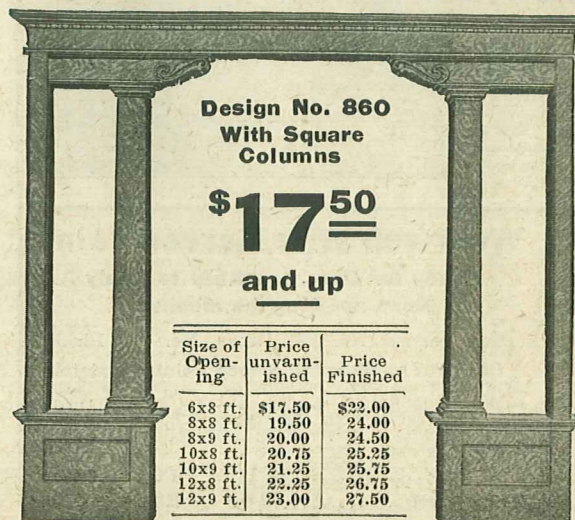

will be found in our Colonnade No. 862, illustrated at left. The columns are gracefully tapered and are fluted about two-thirds of the distance from the base to the composition capital. The well proportioned pedestal has a raised panel on each side.

FOR FINISHING any of the colonnades shown on this page with one coat of filler and two coats best Wearwell Extra Interior Varnish, add \$4.00 to the unvarnished price.

CAREFULLY SELECTED STOCK

The Slightly Tapered Columns,

the paneled pedestal and the ornamental, massive brackets show exquisite workmanship as well as beauty of design. Only selected, thoroughly dried stock of the finest quality is used, but the absence of unnecessary ornamentation permits us to offer this colonnade at prices that may be considered as some of our very best bargains.

STATELY COLONNADES

With Scarcely a Single Exception

all modern residences and first class apartment buildings, now being erected, number among the fittings installed at least one colonnade. The tendency of the times is to secure as much light and air as possible in a dwelling and this result is most easily obtained by having large openings between the various rooms. Of course, these openings must be appropriately trimmed and made to serve a decorative as well as a practical purpose in order to fulfill their complete mission.

The Fluted Columns rest on a pedestal of fine cabinet work and are surmounted by Ionic capitals of the Empire period. An attractive bracket effect projecting from the jamb, rests on the columns.

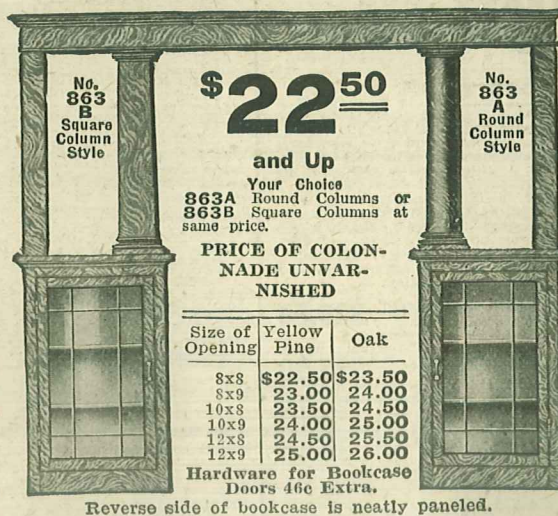

Irregular or Intermediate Sizes

take same price as the next larger size.

Finish When ordered "finished" we apply one coat of filler and two coats of Wearwell Extra Interior Varnish. Natural finish is always supplied on a finished colonnade unless a special stain or color is ordered. When it is desired to match the shade of your interior finishings we must have a sample.

For Finishing with one coat of filler and two coats best Wearwell Extra Interior Varnish, add \$4.00 extra.

Bookcase and Writing Desk Combination

Here is a handsome piece of furniture for the home. Aside from the artistic, pleasing design of the colonnade, it affords a useful writing desk and bookcase combined. Note our unusual price for this high grade cabinet work.

Pedestal 11 inches thick, outside measure, inside depth 9 inches, shelf drop 13 inches deep by 22 inches wide, affording full desk top writing space 22" x 22". Three convenient drawers at bottom.

When Selecting a Colonnade

one should keep in mind the importance of choosing a design that will harmonize with the fittings and furniture of the home or that will fit in with the general scheme of interior arrangement. Design showing grillwork would not prove suitable for a plainly finished bungalow; neither would a plain, straight line effect answer for use in an elaborately furnished dwelling.

—Regular Built Homes vs. Freak Built Houses—

The houses described in our book, "Plans of Modern Homes," are regular permanent houses of standard construction. They are not in any sense of the word "Portable," "Ready-Cut," "Take Down," "Sectional" or "System-Built."

Our homes are exactly the same as the best houses built on your street; homes that have stood for forty or fifty years. They are cut and fitted by the carpenter right on the job, just as each building must be cut and fitted to secure the most satisfactory results.

It's the difference between the hit-or-miss ready-made suit and the custom-made suit built to your order.

To The Contractor and Carpenter

Our plan of furnishing direct to you or the owner the best building material, guaranteed to be in sufficient quantities to erect the strong, permanent buildings of standard construction shown in this book, is in your interest, also in the owner's interest, since these houses are of standard construction fitted and built on the job. You can make comparison of this and convince yourself and the owner of the saving and benefit in putting up such a building as against a "freak" house as now commonly advertised—"Ready Cut," "System Built," "Portable," "Take Down" or "Sectional."

As an example, study house design No. 102 on page 7 of this book. Compare the size of house, number of rooms, description of material and our price with that of any "Factory-Built" house of similar design and size selected from catalogs issued by the manufacturers of these "Factory-Built" houses. This is a rather common design, and you will have no difficulty in finding a similar house. You will note that the price will be from \$150.00 to \$200.00 above our price, and you know that the factory cutting does not save (if it saves anything) more than from \$25 to \$40.00. This illustration will serve as a basis. Other buildings would show a saving of about 20 per cent in favor of the house of standard construction.

Ready-Cut means only trimmed ends on joints and scantling, and much of this work must be again trimmed and fitted on the job. In our buildings the inside trim is cut to lengths and siding square butted, all lumber cut to proper lengths, which permits making a first-class job with no bad joints or leaks.

Under our plan, buying direct at wholesale you make a big saving on materials and get the full benefit of construction and carpenter work, and you can still underbid and save the owner money. You can also deliver a much better job than any building worked from Factory-Cut material. Your interest and the owner's interest is ours, and it is easily proven.

TAKE TIME TO INVESTIGATE

Do not blindly rush into the work of building. Take time to investigate; make sure that you are getting just what you are paying for. Select a good, reliable contractor in whom you have confidence, and let him prove to your own satisfaction that there is in the standard built house an actual saving in price over any of the "Freak-Built" houses now commonly advertised. Build a permanent and better home for less money.

BUILD A STANDARD HOME AT A LOWER COST

Our regular permanent homes of standard construction cost much less than the "Freak-Built" house. As a matter of comparison, take two houses—one of Standard Construction taken from this book, the other a "Freak-Built" house similar in size,

in height of ceilings and in number and size of rooms. You can easily satisfy yourself that the house of standard construction costs much less.

There is no saving in time or cost in the erection of the "Freak-Built" house. The time spent in figuring out how it is to go together, in finding the different pieces and in getting the misfit puzzle in place more than offsets the slight amount of good carpenter work needed in properly fitting and putting up the frame work. Your carpenter or any practical builder will tell you this.

DO NOT BE MISLED

As an advertising proposition, the terms "Portable," "Ready-Cut," "Take Down," "Sectional" or "System-Built" bear an appeal to certain inexperienced home builders, but these terms mean only a freak, shabby house and at a higher cost complete than our regular homes of standard construction.

If you will investigate carefully, you will find that our regular permanent home is better, that better material is used in its construction and that it costs less than any "Freak-Built" house now commonly advertised.

Factory-Built houses of no matter what plan or process are all right for chicken coops, summer cottages and for similar temporary purposes, but are not well constructed and in reality cost more than a permanent home of standard construction.

MAKE COMPARISONS

If you have secured prices on material for a "Factory-Built" house, insist that the manufacturers give you an itemized list of the material required to complete the house, making sure that they clearly specify the quantities, the kind of wood, the size, length and grade of all material that goes into the house. Then compare this list with the material supplied for our houses of standard construction, the quality of which is as follows:

Timbers	} Guaranteed—No. 1 Common Southern Pine.
Joists	
Studding	
Rafters	
Sheathing	} No. 2 Common Yellow Pine.
Floor Linings	
Roof Boards	
Outside Finish	} Clear Cypress, Surfaced.
Facia	
Frieze	
Corner Boards	
Soffits	
Water Table	
All flooring and ceilings	{ Clear Southern Pine, both 1st and 2d floor, with clear Fir Porch Flooring.
Inside Trim	
Doors throughout	Strictly Clear Fir or White Pine.
Windows	Strictly Clear White Pine; best quality American window glass.
All Millwork	{ Interior Finish, Paints, Hardware, Stairwork, Sunk Trimmings, Tinwork Specified is fully described and shown in our Building Material Catalog.

With your plans and estimates secured from us, you receive a list naming and describing by its Catalog number all articles used in the building, thus you have full and complete information as to size, style, quality, etc., of each article used in the construction of your house. You will know in advance that

high class, perfect material will be supplied and that there can be no disappointment when your building is up.

Our houses of standard construction represent custom workmanship to fit as against saw-table cutting that may or may not go together.

THE INVESTMENT VALUE OF YOUR HOME

Your home is the center about which revolves your daily life and the life of your family. You love and enjoy it, and as most men build but once in a lifetime, they should make sure

To The Owner and Homebuilder

Our plan of construction is regular and practical. It means a perfect job at a lower cost and a better permanent house, as against any of the so-called "Ready-Cut," "System-Built," "Portable," "Sectional," or "Take Down" buildings of "Freak" construction now commonly advertised.

Any carpenter or contractor in whom you have confidence will tell you this, and will explain it fully to your complete satisfaction. Our houses are much better and cost you 20 per cent less completed than any similar style and size of building of "Freak" construction. (Read note to contractors and carpenters opposite.) When you want to sell or rent your house, you want to show a regular building of standard construction, that will last forty or fifty years with a minimum expense for upkeep—such as painting and slight repairs. Under our method your first cost will be less, your repairs and upkeep much less. Under our plan you save on the material bill fully five times any saving that might result because of the Factory-Cut feature. You can make the comparisons yourself, or do so with the aid of your carpenter, and prove this assertion to your own satisfaction. On an eight room house our price for material will save you \$150.00 to \$200.00, from which deduct, if you wish, \$25.00 to \$40.00 as an advantage for the so-called "Ready-Cutting," and you will find that we can save you fully 20 per cent and give you a better building of standard construction. Other houses larger or smaller will bear a saving in the same proportion.

Manufacturers of "Freak-Built" houses do not give an itemized list of the lumber they propose to furnish—that is the size, kind of lumber or grade. You do not have any list showing the items, number of pieces or the kind of wood so as to know what to expect when the shipment arrives. You do not know whether the outside finish is hard pine, white pine, cypress or basswood, whereas with our buildings we specify the number of pieces we ship you, the size of each and the kind of wood, as well as itemize each article of millwork and interior finish that goes into the house. We plainly show the price of each item, so you know exactly what you are paying for. There is absolutely nothing left to guess-work.

to build right. Before building you should consider the fact that at some future time you may wish to sell or rent it. Build a home that carries with it a real investment value; build it substantially; make it a house that you will be proud to live in and show to your neighbors.

CHANGES WHEN BUILDING

When building from Factory-Cut material you must build exactly as the stock plans show material; you cannot change the position of your doors or windows as the work progresses without considerable bother and expense. In our houses of standard construction such changes are often made to suit the personal ideas of the builder during the process of construction with very slight trouble and often without any cost whatever for making the change.

Modern Heating Furnaces and Boilers

Write For Our Estimate Before You Invest a Single Dollar

Importance of a Heating System Two very important items in every home are very often given too little consideration, yet they are the most vital. Plumbing is necessary to the health of your family and perfect heating is absolutely essential to your comfort as well as your health. Your heating system should be given a great deal of consideration, because it is not a luxury to be used once in a while; but it is used from four to eight months every year, according to climate of your locality. After you have decided the kind of heating which you will install, whether hot water, steam, furnace or stove, you want the best money will buy. As much attention should be given to the design of your boiler, furnace or stove as to any other feature of your building. Of course, the boiler or furnace is placed in the basement, where it is seldom seen by anyone except the person who takes care of it, yet the results are apparent. Do not consider price only, because the cheapest in first cost is often the most expensive in the end.

Expert Service We employ expert engineers whose years of experience we place at your disposal. Why not let them aid and guide you in your selection of a heating system? When you purchase a heating apparatus from us, you can rest assured each part of it is of the right size, in the right place, and of ample capacity so you will not have to force the fires even in the severest weather. If the plant is not scientifically designed, it is worthless.

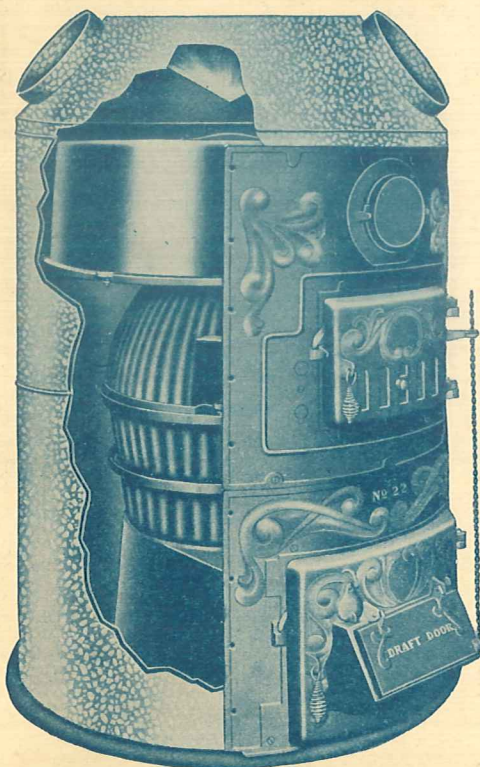

How to Obtain an Estimate Send us a plan of your building showing the dimensions of the rooms, height of the ceilings, size of windows, size of outside doors, location and inside dimensions of chimney, points of compass, and give an idea of how well your building is constructed and protected. We know the varying temperatures in your locality. Specify the kind of heating you desire and you will receive a proposal of the cost of the material for such style of heating, including freight charges prepaid by us to your station.

We Furnish You with Instructions On receipt of your order you will be furnished with a detailed blue print showing the location of every piece of material which we ship you. There is positively no chance of your not fully understanding just how to use the material, because we furthermore furnish you with detailed instructions telling you how to proceed.

Guarantee We guarantee all of our Heating Equipment against defects of any kind in workmanship or material, and will replace free of charge any part or parts showing such defects. We further guarantee that when heating system is installed according to our plans that it will, during continuous operation, heat each and every room having a radiator or register to 70 degrees during the coldest Winter weather without forcing the fires.

HOT AIR FURNACE—Cast Iron Radiator

Water Pans of large capacity are furnished, and may be easily filled with water. This provides a means of furnishing proper moisture to the air within your home.

Openings are provided so that coil or water heater may be inserted in fire pot for heating water for domestic use.

Nickel Plated Regulator furnished with all furnaces, also chains, pulleys and check dampers. Dampers may be regulated from the first floor. This saves a great many unnecessary steps.

Cup Joints are used throughout and are packed with asbestos cement, which renders them impregnable to leakage of gas or smoke. This makes the furnace absolutely dust and gas tight.

Double Casings are of heavy galvanized iron, and so proportioned that the air coming in contact with the heated furnace has a free and unobstructed passage. The bonnet is made with pitched sides and dished top, so warm air runs can be taken from the sides and used where there is not much head room in basement. If straight sides and flat top is preferred, we can furnish same without additional cost.

Mountings are made with great care. Each furnace is set up in factory and inspected before shipment is made; thus, each furnace is perfect in every respect. All doors and frames are machined.

Radiator is made of extra heavy cast iron and provided with a large interior air passage, so that a great deal of the air to be warmed passes between two heating surfaces before entering the Warm Air Pipes. Cast iron radiators are 20% more efficient than steel.

Fire Pots are extra heavy, deeply corrugated, made in two sections and of the best quality pig iron. Ashes cannot gather at sides. This increases the efficiency of furnace. Fire pots have large cup joints to provide for expansion and contraction.

Grate Bars are of the rocking pattern, triangular and very heavy. Any grate bar may be easily replaced without disturbing the others.

Ash Pit is extra heavy and unusually deep, allowing ample space beneath the grates to prevent their being burnt out. Each furnace is shipped complete, including water pan, check draft damper for smoke pipe, regulator and chains for operating drafts, shaker, double casing, including bonnet and all necessary bolts for use when setting up the furnace.

Steel Radiator furnace can be furnished at considerably less money.

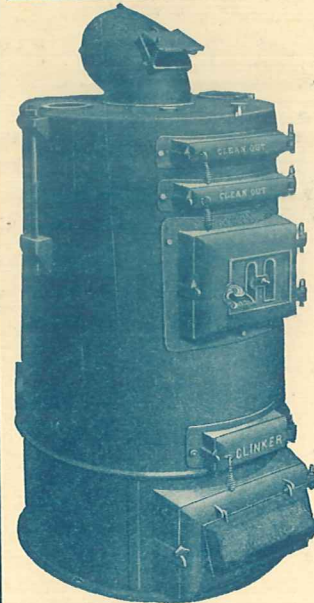

Prices on application.
Note Casing collars are not included in prices quoted below, but are shown on illustration to indicate how same are connected.
Shipped from our Factory in Central Illinois.

Catalog No.	Diameter of Fire Pot, Inches	Depth of Fire Pot, Inches	Diameter of Casing, Inches	Diameter of Grate, Inches	Heating Capacity, Cubic Ft.	Shipping Wt. Complete, Lbs.	Price, Complete

HOT WATER AND STEAM BOILERS

Arched, Corrugated, Extra Deep Fire Pot. Narrow Waterways. Rocking and Dumping Grates. Taper Push Nipple Joints. Burns Hard or Soft Coal, Coke or Wood.

Construction Ash Pit is deep owing to height of base section, which is fitted with rocking and dumping grates. A lock plate is provided to insure grates being in proper position after being shaken. Butterfly damper in large ash pit door operated by damper regulator on steam boilers and ratchet on Water Boiler supplies oxygen to fuel.

Hot Water Boiler

Firepot Section is heavily corrugated on inside, and is extra deep, providing a large fuel capacity, thus allowing long periods between firing. These sections are fitted with two openings so water may be heated for domestic purposes from coil placed in firepot.

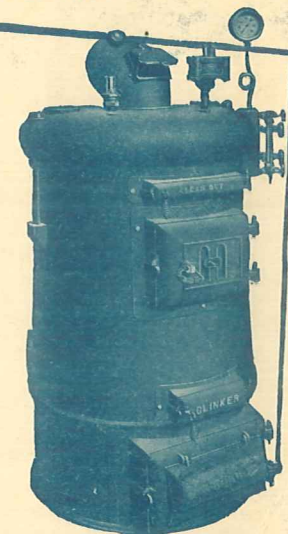

Fire Travel is staggered, which insures no waste heat, the products of combustion being constantly backed by water.

Steam Dome is of ample height to store a large amount of dry steam.

Water Dome is different construction. The bodies of water are divided so as to readily absorb the heat units and leave the boiler at a high temperature.

Our Boilers are especially designed for residence heating. The round corrugated fire pots are a safeguard against dead corners and increase the efficiency of boiler. Boiler may be easily installed in any building. Will go through a door 2 feet 6 inches wide.

Steam Boilers are furnished with automatic damper regulator with lever and weight, chain, safety valve, steam gauge, water column, water glass, brass guards for water glass, and pipe and fittings to connect trimmings to boiler. Water and steam boilers are furnished with poker, flue brush, hoe and shaker. Shipped direct from Chicago.
